INNOVATION LEADING TO SUSTAINABLE PERFORMANCE

The Ecolution is a sailing ship that can be sailed by two people and can take four to six guests. The sailing yacht is full of innovations in the field of green energy, modern sailing techniques and comfort without damaging nature.

The Ecolution is a creation of the Dutch astronaut Wubbo Ockels. After traveling to space, he decided that the earth deserves better, so he built a hybrid sailing ship that can sail all year round, all over the world. After his death, a few years ago, the ship became the property of the WadDurzaam Foundation, which aims to promote sustainability.

At this moment the boat is being converted for hydrogen propulsion. The intention is that the existing batteries are replaced by solar cells, hydrogen and fuel cells. In addition, the aim is to produce hydrogen on board of the Ecolution itself, by using the energy generated during sailing.

In 2020, the ecological ship will be present in Japan as a figurehead of the energy transition to hydrogen. Japan has set itself the goal of organising the most sustainable Olympic Games in history, with a key role for green hydrogen.

Finixa was recently granted the ISO 14001 certification, which is an international standard for organizations that want to systematically manage their environmental responsibilities, which contributes to the environmental pillar of sustainability. One way in which Finixa tries to contribute, is by working on solutions to replace traditional solvent-based products by high-performing water-based alternatives. In this catalogue, we are happy to announce a large number of new products that carry the eco-label.

Chemisar Europe NV, based in Belgium, designs and develops high-quality, non-paint products (consumables and equipment) under the brand name Finixa. Our main target group is the automotive collision repair sector. The company started up 35 years ago and evolved from a large distributor to a marketing company, designing most and producing part of its Finixa program.

As repairing a car's collision damage is very similar to repairing cracks, holes or dent in a ship's hull, the same non-paint products are used. This catalogue contains all the Finixa non-paints that are perfectly suited for the maritime construction and repair business.

The distribution & production centre of Finixa is situated in Zwijndrecht (B), at the heart of Europe. Products are shipped to our dealers all over the world.

HIGH QUALITY

Our products are tested extensively before they are brought onto the market.

INNOVATION

Working techniques and equipment often need to be updated as the way cars or boats are built evolves continuously. Our research and development department focuses on product innovation and improvement in order to not only meet the demands of the market, but to simplify the repair process.

ECOLOGICAL

We work on finding solutions to replace traditional solvent based products by high-performing water- based alternatives.

DEALER NETWORK

Chemcar supplies the maritime repair business via a global network of dealers. We have distributors on an exclusive and non-exclusive base in almost 100 countries.

TRAINING CENTRE

The Finixa training centre is fully equipped with the latest technology for the maritime and automotive repair business, including a spray booth. As part of our support plan, we offer technical training, to be organised at our headquarters in Belgium. Here, our dealers worldwide are trained in and informed about our technology in our 450 m² training centre.

State-of-the-art training centre

Training tailored to your needs

We organise courses and workshops as a forum to share know how and experience. Customers from all over the world visit our training centre to get demonstrations on how to use Finixa products. Of course, they also get the opportunity to do themselves what they have learnt. This gives our dealers the means to ensure that they work with our products in a safe manner while guaranteeing that they end up with a perfect result.

PRODUCT CATALOGUE 2019 - 2021

We are pleased to introduce to you our Finixa catalogue, with more than 180 pages of high-quality products for the maritime repair business.

Find a digital version online in 6 languages. To view or download the latest edition, visit www.finixa.com.

PRODUCT FEATURES COMPARED

Honest comparison of similar products via spider web diagrams or feature overview, in order to help guide you to select the right product for your application.

ALPHABETICAL LISTING OF ARTICLE NUMBERS

Find packaging details and quantities of all products at the back of the catalogue in the ABC-list.

MORE THAN 60 NEW PRODUCTS

to further diversify our product range for your convenience. Finixa as one-stop-shop for all your non-paints.

MORE TECHNICAL BACKGROUND INFORMATION

Each chapter starts with a grey page with eg. insightful information on the available products per chapter, technical details and how to read certain icons.

USE OF ICONS

Icons are used to indicate whether a product is biodegradable or for what possible applications the product is used. Icons are always explained on the grey pages.

NEW PRODUCT CLASSIFICATION

The products are classified according to our new training modules. Take a look at the next 2 pages for a complete overview.

This catalogue is made of recycled paper.

MCBL

MCP
PRINTED MIXING CUPS

- Optimized height-width dimensions for more accurate mixing
- Clearly printed and readable from the inside mixing ratios
- 10 different mixing ratios
- Available in 6 volumes: 400cc, 650cc, 900cc 1300cc, 2240cc and 5000cc
- Base feet protecting against cold transfer during mixing
- Stack supports for easy separation
- Winter proof plastic
- Lids available separately
- Also available in an untransparent black version, ideal to store UV sensitive paints like water based base coats or UV primers
- Dispenser in stainless steel available separately

FPS PAINT SYSTEM

- The lid fits on 400ml, 650ml and 900ml mixing cups.
- The system can be fitted directly onto the spray gun by means of a quick connect coupling.
- No paint loss/reminders: the cup can be completely sprayed empty.
- Substantially saves money and time to clean spray guns.
- Fit for both solvent- and water-based paints.
- Available in 125µm (green) and 190µm (white).
- Supplied with strainer and valve installed.
- Lids and cups sold separately substantially saving paint system components, nothing is wasted!
- Easy to fill.
- Individually wrapped in plastic foil, always clean.
- 50 pieces in a handy dispenserbox.
- Printed mixing ratios: 2:1 / 3:1 / 4:1 / 5:1 / 6:1 / 7:1 / 8:1 / 9:1 / 10:1 / 12:1
- Several adapters for different spray guns are available.

SPRAY GUN**

- Ergonomic grip.
- Minimal overspray, maximum transfer efficiency.
- LVLP technology: over 74% effective transfer efficiency.
- Lightweight anodized aluminium body, available separately: stainless steel needle set.
- Can be used for water-based and solvent-based paints.
- Required airfeed pressure: between 1.8 and 2.2 bar.
- Incl. cup 500 ml (also available as spare part SPG 500C).
- Nozzle set to be purchased separately (not included).

Spray guns

SPG 100 SPRAY GUN

- Ergonomic grip.
- Minimal overspray, maximum transfer efficiency.
- LVLP technology: over 74% effective transfer efficiency.
- Lightweight anodized aluminium body
- Can be used for water based and solvent based paints.
- Required air feed pressure: between 1.8 and 2.2 bar.
- Standard with a 0.8mm nozzle. Nozzles 0.8mm, 1.0mm, 1.2mm also available separately.
- Incl. cup 100 ml (also available as spare part SPG 100C)

SPG 100K NOZZLE SET FOR SPG 100

- Nozzle set for SPG 100 spray gun.
- Includes nozzle, needle and aircap
- Available sizes: 0.8mm, 1.0mm, and 1.2mm

SPG 500 SPRAY GUN

- Ergonomic grip.
- Minimal overspray, maximum transfer efficiency.
- LVLP technology: over 74% effective transfer efficiency.
- Lightweight anodized aluminium body, available separately: stainless steel needle set.
- Can be used for water-based and solvent-based paints.
- Required airfeed pressure: between 1.8 and 2.2 bar.
- Incl. cup 500 ml (also available as spare part SPG 500C).
- Nozzle set to be purchased seperately (not included).

SPG 500K NOZZLE SET FOR SPG 500

- Nozzle set for SPG 500 spray gun.
- Includes nozzle, needle and aircap.
- Available sizes: 1.3mm, 1.5mm, 1.8mm, 2.0mm and 2.5mm.

SPG 80 10 L PRESSURE TANK

- The combination of the 10L tank and 10m air/paint tubes makes the SPG 80 the ultimate tool to protect your spraybooth by applying cabin protect.
- Includes a set of hoses (black and transparant) and a spray gun with a 1.8mm nozzle set.
- Place SPG 80 in the centre of the spray booth, no need to move as 10m tubes will allow you to go around the complete spray booth without having to move the tank.
- Combination of an aluminium spray gun and a galvanized powder coated tank allows you to apply in a very comfortable way any primer, basecoat or topcoat, water or solvent based coatings.
- Available as spare parts: SPG 83 transparant hose, SPG 82 set of hoses, SPG 81 spray gun for pressure tank

SPG 800

SPG 900

SPG 800-900
HIGH TRANSFER SPRAY GUN - BASE/CLEAR

With the new spray gun series, Finixa launches a premium inhouse developed gravity feed spray gun, that meets all VOC regulations. The gun comes in two finishes, a mat version (SPG 800 for basecoat) and a glossy one (SPG 900 for clears). Standard supplied with a 1.3 nozzle kit, optionally available are 1.2, 1.4, 1.5 and 1.8mm nozzle sets (SPG 900K). These LVLP technology guns produce the finest automation at 1.0-1.3 bar resulting in high-paint transfer with a very low overspray. These guns do not only perform extraordinary but are built to last:

- Lightweight aluminum body
- 100% stainless steel fluid passages
- No rubber parts in the design
- Ergonomic grip
- Fine automation
- Flat spray image
- Easy to adjust
- Fast and smooth application
- Delivered in a hard case including plastic cup 600ml and service tool
- Handy pressure regulator (SPG 920) and maintenance kit (SPG 910) optionally available
- Inlet pressure between 1.8 and 2.2 bar, outlet pressure between 1.1 and 1.4 bar
- To combine with the FPS, use the FPS 01 adaptor

Paint strainers

BBF 10 STRAINERS FOR GRAVITY FED SPRAY GUNS

- Plastic paint strainer designed for placement inside the suction channel of the gravity cup of a spraygun.
- 275µm - 10p

NVZ 0125-0400 PAINT STRAINER

- 400µm PURPLE - NVZ 0400
 - 280µm GREEN - NVZ 0280
 - 226µm GREY - NVZ 0226
 - 190µm RED - NVZ 0190
 - 125µm BLUE - NVZ 0125
- Paint strainers are suitable for use in combination with solvent and water based paints.
 - All paint strainers are packed in handy dispenser boxes. Each dispenser box contains either 250 or 100 strainers.
 - Minimum ordering quantity is 600 or 1000 pieces (4 - 6 dispenser boxes in 1 outer box) depending on the type of strainer.
 - Perfect nylon grid.
 - Accurate filtering.
 - No equal on the market !

GAC 0250-1000
MIXING PADDLES

Due to the straight shape of the plastic mixing paddle, it is easy to remove paint from the mixing cup. Length: 23 cm.

Sales units:
GAC 0250: Box containing 250 mixing paddles
GAC 1000: Box containing 1000 mixing paddles

1 PAINT PREPARATION & APPLICATION

Sample plates & accessories

SSP 00-01-02 SPRAY SAMPLE PLATES

- Metal plates for colour sampling
- Colours: pre-treated with white, light- or dark grey primer.
- Black line over the complete length to check colour covering after spraying.
- Dimensions: 105mm x 150mm.

SSP 00

SSP 01

SSP 02

DDD 00 3D SPRAY SAMPLE

- For test spraying 'special effects' colours.
- The complex shape of the spray sample allows the operator to check paints in all angles.
- Dimensions (l x w x h): 230mm x 130mm x 45mm.

SSP 40

SSP 50

SSP 42

SSP 40
FILING SYSTEM FOR SAMPLE PLATES

Filing system for 250 SSP sample plates with or without envelope. System carries one plastic filing box with 6 adjustable dividers, 32 blank labels and a marker to make notes on the back of the plates.

SSP 42
ENVELOPPES FOR SPRAY SAMPLES

SSP 50
MAGNET HOLDER AND STAND FOR SAMPLE PLATES

Magnet holder (fork) and magnet stand for hands-free handling of the SSP spray samples.

ILO 10

ILO 10
DRYING OVEN FOR SPRAY SAMPLE PLATES

- The drying oven for SSP spray samples simulates the curing process of a spraybooth by using a combination of infrared heating and airflow system for an optimum result. Drying oven is suited for drying water-based paints as well as solvent-based paints.
- Drying oven has an air valve, a temperature gauge and a timer. Power of the infrared lamp is 300W, electrical specifications are 220V, 1.5A, 50Hz and pressure intake has to be 3 bar.

1 PAINT PREPARATION & APPLICATION

Problem solvers for non-paint refinishing

EQU 85 SPRAY GUN SUPPORT WITH MAGNET BACKING

- Very strong magnet; holds 2 filled spray guns
- Can easily be replaced
- Keeps your airlines clean and off the floor

MAK 00 CLEANING KIT FOR SPRAYGUNS

- Complete set of tools for cleaning and maintaining spray guns.
- The set consists out of 8 brushes for cleaning the interior, 3 small brushes with holder and one large brush for the exterior, 6 needles with holder for cleaning the nozzle and a bottle of lubricant to maintain the moving parts.

SIP 1000 SIPHON

1L bottle with siphon to accurately add liquid to a mixture like distilled water into water-based base coats.

PIP 03 PIPETTE

Precisely remove any excessive pigment from a mixture. Can also be used to precise add liquid to mixture.

GAD
BLACK PLASTIC (PE) STORAGE CUPS

- Black cups are not transparent and ideal to store and transport “UV sensitive” coatings like UV primer/fillers or water based basecoats.
- Each cup is supplied with an airtight sealing lid and suitable for transportation of ready mixed colours.
- UN approved; suitable and tested for road transport of water-based paints.
- Fit to store water-based paints for months.

- Plastic bottles with a lid with integrated brush, to touch up car paint.
- Supplied with a rust-free chromated mixing bullet which makes this bottle suitable for water paints and solvent based paints.
- Completely transparent.

PRE-PAINT CLEANING AND DEGREASING

Non-greasy, dust-free surfaces are an absolute must to obtain professional paint results.

The perfect surface preparation can only be achieved by using the right combination of cleaners, towels and tools.

Based on work floor experience and valuable feedback from our customers, we constantly fine tune our product range in accord with the latest paint technology.

Water-based degreaser

FOR MORE INFORMATION,
CHECK OUT OUR VIDEO ON:
WWW.FINIXA.COM/EN/VIDEOS

DGR WATER-BASED DEGREASER

DGR 05/25/200 is a water-based cleaner. Can be used to remove dirt, dust, swarf and to degrease all kinds of surfaces such as old paint layers, transport primer, other primers, metal (steel, aluminium and galvanized pieces) and plastic.

To remove residues of tar or glue, we recommend to use a solvent-based degreaser, or use DGR in combination with SBR, but for all other pollution (dirt, sanding dust, fat, finger prints, swarf, ...) this water-based cleaner offers a lot of advantages compared with solvent-based cleaners:

2004/42/EG

VOC COMPLIANT

Eliminates salt and soap rests

By using 2 cloths, the water-based degreaser removes all dirt from the surface without leaving any traces.

Can be used without mask or gloves

Next to being nature friendly, the water-based degreaser can be used without any protective gear.

Antistatic action on the surface

Compared to solvent-based degreasers, the water-based degreaser completely nullifies any static action on the surface.

Does not affect rubber or plastic

The water-based degreaser does not affect rubber or plastic, while solvent-based degreasers almost always cause damage to the surface.

FOAM IT!**

Foam it! is an ammonia-free universal water-based cleaner and degreaser in an aerosol. In contradiction to what is on the market already, Foam it! is not only ammonia-free but leaves, once sprayed, a thin foam layer on the surface. This foam releases all kinds of dirt and grease almost instantly from any surface and wipes off very easily, without leaving any traces. Can be used as a general purpose cleaner, but is also useful to prepare a surface before painting or plastic repair considering its unique degreasing formula.

Application: spray Foam it! and wipe off with a soft microfiber or non-woven cloth.

The applications are endless:

- Exteriors (dry cleaning of painted parts)
- Interiors (plastic, leather, wood, metal, glass, dashboards, door panels, LCD screens)
- Kitchen and bathroom cleaner (anti-bacterial quality)
- Window cleaner

SOF 25 DEGREASING CLOTHS IN DISPENSER BUCKET

- In need of more control while degreasing, pressure sprayers often create overspray on already paper masked surfaces or non-treated tapes. SOF 25 is a ready-to-use degreaser. Just add 3L of water-based degreaser to the bucket and it is ready to use. Every cloth removed from the bucket will be pre-treated with degreaser for extra control.
- Available in dispenser bucket 280mm x 300mm - 100p

SOF 251 REFILL PACK FOR SOF 25

Set of 6 rolls degreasing cloths for the SOF 25 degreasing system.

TACK RAGS STANDARD / TACK RAGS STANDARD WATER-BASED

- Unique impregnation: never dries out - silicone-free.
- Before use unfold completely and then make a ball; use this ball to rub the surface gently, by doing so the rag will wipe away all dust.
- Attention: do not put pressure on the rag during use, as you might only move the dust instead of wiping it away.
- Extra advantage TAK 01:
 - Impregnated with a water-based product: works anti-static, unlike other tack rags.
 - Never leaves traces of glue that could possibly cause a reaction with any paint.

See overview on page 33

TAK 10-11

TACK RAGS CTI / TACK RAGS CTI WATER-BASED

- Tack rag with a wavy surface structure: once removed from the packaging, instantly ready for use.
- Ideal for large surfaces.
- Attention: do not put pressure on the rag during use, as you might only move the dust in stead of wiping it away.
- Extra advantage TAK 11:
 - Impregnated with a water-based product: works anti-static, unlike other tack rags.
 - Never leaves traces of glue that could possibly cause a reaction with any paint.

See overview on page 33

TAK 20
TACK RAGS SOFT

- Made of non-woven material, no cotton.
- Before use unfold completely and then make a ball; use this ball to rub the surface gently, by doing so the rag will wipe away all dust.
- Attention: do not put pressure on the rag during use, as you might only move the dust in stead of wiping it away.

See overview on page 33

TAK 30-31
TACK RAGS SMOOTH

- Impregnated with a water-based product: works anti-static, unlike other tack rags.
- Never leaves traces of glue that could possibly cause a reaction with any paint.
- Also ideal to quickly remove dust from furniture or other smooth objects on wood, metal or plastic.
- Ideal for large surfaces.
- Attention: do not put pressure on the rag during use, as you might only move the dust in stead of wiping it away.
- Also available in individual packaging: TAK 31

See overview on page 33

SOF 90-92 FLOOR STAND ROLL DISPENSER

- Dispenser powder-coated in blue.
- Tearing element helps to block the roll in the right position and tear off one or more cloths.
- For rolls with core of min. Ø5cm to max. Ø7cm and length min. 30cm to max. 37cm.
- Available with bin bag fastener (SOF 92)

SOF 91 WALL MOUNT ROLL DISPENSER

- Dispenser powder coated in blue.
- To be mounted to a wall
- Tearing element helps to block the roll in the right position and tear off one or more cloths.
- For rolls with core of min. Ø5cm to max. Ø7cm and length min. 30cm to max. 37cm.

LSP 20
PRESSURE SPRAYER 1L

- Pressure sprayer for spraying water- and solvent-based degreasers.
- Resistant to solvents due to viton parts, always consult resistance list before use.

LSP 15
FINIXA PRESSURE SPRAYER 500ML

LSP 50
CODING CAPS

Tired of searching for the correct and/or misplaced pressure sprayer? Use the set of 5 coloured magnetic holders and coding caps to organise your workshop! The caps are placed over the sprayers' nozzle so there is never a risk of contamination while refilling. The holders can be fixed to metal using the strong magnet or fixed to any surface using 2 screws.

RJE 20-21
RUBBER JET

- The rubber tip makes it easy to blow out dirt and dust from cracks and joints without the risk of damaging paintwork.
- The airflow can be regulated by loosening or tightening the screw on the RJE.
- 2 versions available: RJE 20 to be used with a customer provided airline coupling or RJE 21 which has a CJEN coupling pre-installed.

WJE 05
WINDJET

- Windjet air nozzles deliver a high performance flat jet of compressed air.
- The nozzle (made of ABS plastic) is designed for cooling, drying and cleaning by hand or in a fixed setup.
- Ideal for drying water-based paint jobs on spot repairs.

25L

DGR 05 DGR 25

CSH 05 ALL IN ONE CAR SHAMPOO

- Excellent cleaning power.
- Top wax protection included.
- Almost completely self drying.
- Ensures gloss back easily.
- Bio-degradable.
- Can be used by hand or high pressure cleaner

SPW 05 SPRAY WAX

- Unique formula, never leaves traces, not even on windows.
- Can be used directly on the hull surface (dry) to add gloss and protection.
- Also to be used on a wet washed surface, to improve drying in combination with microfiber towels.
- Without any silicone content, safe use.
- Helps remove holograms after polishing.

CLP 15 CLAY PAD WITH VELCRO 15 CM

- For fast and effortless removal of paint spray mist, resin, insect remains, old wax, etc.
- 15 cm diameter
- Makes claying fast and easy
- Use in combination with Finixa water-based degreaser
- For use on orbital sanding machines at moderate speed
- Optional velcro adapter for hand use

CLP 16 VELCRO HAND PAD 15CM

Adapter for manual use of clay pad CLP 15

TWL 00 LARGE MICROFIBER CLOTH

- TWL 00 is a large double-sided long-haired microfiber cloth with which it is possible to dry a small/middle sized boat in one go, without wringing out the cloth.
- Microfiber is a high-quality textile composed of polyester and polyamide. Microfiber cloths can be used both dry and wet. In a dry state they attract dust and dirt as a powerful magnet.
- When wet, they can absorb more than 7 times their weight. Dimensions 60cm x 90cm. Packed individually.

SPM-SPJ 00 SPONGES

- Jumbo sponge to clean boats, cars, motorcycles, vans,...
- Highly water-absorbent
- Microfiber skin removes aggressive dirt faster without leaving any scratches

DRW 05
DRY WASH 5L

- Waterless cleaning and protecting in one go
- Lifts and encapsulates dirt particles; no scratching, not even on dirty surfaces
- Twice as fast as normal washing; no water needed, no rinsing, no chammying
- Fast and easy to apply; spray, spread out and buff
- Streakless, water-repellent finish with a deep gloss
- Silicone free; wax protection included
- Works best when using 2 Finixa microfiber cloths POL 40
- 1 litre cleans approximately 100m²

BUC 12
BUCKET WITH SPOUT

12 Litre bucket with pour spout, available with optional 'anti-dirt' screen keeping larger dirt at the bottom and avoiding the transfer of these sharp components to your vehicles surface.

MHW 05-10
MACHINE AND HAND WAX

- Protect your paint or polished work for a long time; use the Finixa hand and machine wax by hand or machine.
- High-grade natural and synthetic wax components.
- Deep gloss result
- Durable paint protection
- Grapefruit smell.
- By hand: rub in with POL 33, wait a few minutes and polish the excessive dry product away with a clean microfiber;
- By machine: apply at medium speed and a soft pad the product onto the panel and afterwards wipe away the excessive with a microfiber.

MHW 05 MHW 10

WWB 00
WATER BLADE

- Soft silicone blade for removing water fast and easy after washing down a vehicle without harming the lacquer.
- Works very fast.
- Makes no scratches.
- Flexible silicone blade moulds to the shape of any surface.
- Virtually eliminates messy towels and chamois.
- Reduces streaking by 80%.
- Suitable for all surfaces.
- Width: 33cm.

POL 34
HAND FOAM PAD - MEDIUM

- Open foam pad with handgrip - medium hard
- For manual polishing, waxing or applying black tire gel

ACG 00
CLEAN GUM

- Kneadable gum for removing paint overspray without harming the lacquer.
- Apply Finixa waterbased degreaser (DGR) to the surface and rub the overspray away with the gum.
- Can also be used to remove other contamination from the lacquer: such as tar, tree resin, flies, ...

HAND FOAM PAD**

- Soft open foampad with handgrip
- For manual polishing or applying plastic renewal gel

**TSP 600
FOAM IT!**

See overview on page 35

**POL 40
MICROFIBER CLOTH GREEN
- 40 X 40 CM - 5P.**

The super soft green microfiber cloths, packed 5 pieces, ideal to remove polish residue and to create a gloss on the surface.

**LRS 01
LEATHER SHINE AND PROTECT**

Water-based protective cream creating a barrier to prevent penetration of dirt contamination in the leather. It will not make the leather more glossy than how it was before: respects the original gloss/matt finish of the leather.

See overview on page 70

POL 05-10 ONE STEP POLISH PASTE

- Based on nanotechnology, this paste can polish not only very fast from coarse to very fine, but it also brings back a gloss degree of 95%. An additional advantage is that this paste stays “wet” for a long time and it minimizes the risk for dry powder residue. This polish paste can be used on old paints and fresh paints, also on all 2K products and the newest generation of gel coats.
- Can be used for different applications: removing dust, polishing spray zones, polishing contamination after sanding, bringing back gloss on old, mat paints, refurbishing polycarbonate windows, etc.

Advantages:

- 1 product from start to finish
- Water-based
- For used on fresh and weathered paints
- Up to 50% time saving
- Eco-friendly; no need for masks or gloves
- Easy clean-up, even on black plastic parts
- Very high cutting power
- Low dust formation
- Outstanding gloss

PNEUMATIC POLISHER

The lightweight pneumatic polisher has a special speed control function, allowing the user to regulate the speed of the polisher and therefore also suited in combination with the POL 10 leading to maximum performance from low to medium speed polishing.

POL 56 (M14) / POL 57 (5/8)
INTERFACE POLISHING PAD

Universal, fits on almost all electric polishing machines. This polishing pad is unique because of its flexibility: when polishing flat, you use the entire surface of the polishing pad just like other polishing pads (diameter 145mm). But with this pad you can also easily polish over edges and even polish at an angle which makes it possible to put locally and temporarily more pressure on the surface while the polishing pad itself stays flat.

POL 55
ELECTRIC POLISHER

- 1050W
- 2:1 transmission - high torque at low RPM
- Improved cooling-ventilation system
- Adjustable from 700 up to 2500 RPM
- Very lightweight (2,6 kg): easy and comfortable handling
- 5m cable
- Including backing pad, side handle and spare carbon brushes

DRF 05-10 DUST REMOVAL FILE

- A dust file made of very hard metal for removal of dust and dirt from dried paint.
- Simply lay the file flat down on the surface and gently cut the contamination out of the paint with a minimum of damage.

DRF 50 DUST REMOVAL FILE APPLICATOR

- Applicator to be used in combination with DRF10.
- The magnet inside the applicator makes sure the file stays fixed during application.
- The applicator can also be used in combination with the SPDM sanding flowers. Stick the SPDM to the flat side of the applicator and you're ready to go.

PMP 20-21-22 TOUCH UP TIPS

- 100 touch-up tips packed in a convenient and dust-free dispenser.
- Ideal for touching up small paint damage and paint chips.
- The plastic shaft with push-free tip is disposable, convenient and cheaper than a classic brush. Always a clean tip at hand!
- Can also be used as a pencil. By changing the pressure, you receive a bigger or smaller print. Ideal for making small lines.
- Available in 3 thicknesses:
 - blue (regular) PMP 20 = 2,0mm
 - yellow (fine) PMP 21 = 1,5mm
 - white (very fine) PMP 22 = 1,0mm
- Thickness of the applicator = 3,28mm

CNS 10 CLEANING NEEDLE SET

- A set contains one penholder with 10 replacement needles, individually packed in a blister.
- The needles have microscopic small hooks which make it possible to remove dust and dirt from wet paint.

PAINT CHIP REPAIR UV

- Fast UV curing clear coat for paint chips and scratch repair
- Fast, simple and cost effective repair of chips and scratches
- 1 component, fast curing
- No shrinkage after curing
- High level of finish
- Same strength, durability and chemical resistance as a 2K clear coat
- Can be sanded and polished after 45 seconds
- Curing with stone chip curing lamp SCL 00

THE PERFECT PAINT CHIP REPAIR IN 10 EASY STEPS:

- Clean/degrease the surface with TSP 600 Foam-it!
- Sand around the paint chip with SPDM P1500-2000
- Clean with TSP 600 Foam-it!
- Apply the base coat
- Dry the base coat
- Apply stone chip repair UV with PMP touch-up tips
- Dry for 45 seconds at 20mm distance with paint chip curing lamp
- Remove excess clear coat with DRF 10 dust removal file
- Sand with SPDR P1500-2000
- Polish with Finixa polishing system

SCL 00
PAINT CHIP CURING LAMP

- Universal, handheld LED lamp for UV drying
- 3.7 V. lithium, rechargeable battery
- Recommended distance to surface: 10 – 30 mm.
- High power – 5 W.
- Can also be used as a detection and inspection lamp

LEATHER REPAIR

It doesn't matter what type of leather you have, or what colour, Finixa offers a range of leather repair products that can be used on them all.

Due to unique water-based products, anyone can now repair leather like a professional!

Finixa offers you a handy all-in-one leather repair set containing all necessary products to fix damages on leather such as rips & tears, cuts & cracking, burns and holes. The set also includes step-by-step guidelines on how to get a professional result.

By using our colour sample, you can mix the colour you need and touch up with a sponge or, for larger surfaces, apply the colour with a spray gun.

GENERAL INFORMATION

Leather and plastic repair system - the easiest
“all-in-one” system on the market

The Finixa Leather Repair System “LRS”
is a universal cleaning, repair and repaint system.

Does not only repair and restore leather, but also plastic interior parts such as door panels, dashboard and consoles. Easy to use and very cost effective.

CLEANING & PROTECTING

- Ink dissolver
- Water-based cleaner
- Water-based leather cream

RESTORING

- Solvent-based cleaner
- Leather adhesive
- Filler
- Structure copier
- Structure spray

COLOURING

- Water-based touch-up colours (sponge)
- Water-based spray colours (spray gun)
- Water-based top coat gloss/matt

LRS 70 MATT TOP COAT

Matt top coat is a water-based topcoat giving a matt, durable finish with a high scratch resistance. Excellent flow-out making it easy to apply. Can be mixed with glossy top coat to add glossiness.

LRS 71 GLOSSY TOP COAT

Glossy top coat is a water-based topcoat giving a bright, durable finish with a high scratch resistance. Excellent flow-out making it easy to apply. Can be mixed with matt top coat to reduce glossiness.

LRS 72 TOP COAT ADHESION PROMOTER

Additive for matt or gloss top coat, promoting the adhesion of the top coat and results in a better rub resistance after application.

LRS 01 LEATHER SHINE AND PROTECT

Water-based protective cream creating a barrier to prevent penetration of dirt contamination in the leather. It will not make the leather more glossy than how it was before: respects the original gloss/matt finish of the leather.

250 ml

1L

LRS 143-153
LEATHER COLOUR SPRAY

- The leather colour spray is a high-pigmented and concentrated leather paint, designed to respray, restore or re-colour leather surfaces.
- A complete coverage can be achieved with reduced layer thickness that will make the leather keep its natural look and feel even after repainting. To be used by spray gun and to be finished with a top coat. Available in 11 colours in 250 ml bottles. The colours black and white are also available in 1L bottles.

LRS 243-244
LEATHER COLOUR SPRAY - WHITE OR BLACK 1L

High-pigmented and concentrated leather paint, designed to respray, restore or re-colour leather surfaces. Identical to articles LRS 143-144, but in 1 L bottle in stead of 250 ml.

1l

LRS 257-258
FINISHING LAYER - GLOSSY OR MATTE

- Water-based top coat giving a durable finish with high scratch resistance.
- Excellent flow, making it easy to apply.
- Can be mixed with either the glossy top coat to add glossiness or with the matte top coat to reduce glossiness.

250 ml

LRS 172
TOP COAT ADHESION PROMOTER

Additive for matt and gloss finishing layer. Promoting the adhesion of the finishing layer results in a better rub resistance.

POLYESTER PUTTIES

For over 20 years now, Chemicar has been producing polyester putties. The first one being the black universal putty 'GAP 00', often copied, but never matched. By continuously developing new types of putties and by improving existing formulas we have become one of the leading putty manufacturers. Given the influence of the ever increasing labour costs on the total repair price, all our putties meet a high quality standard.

POLYESTER PUTTIES

5.1	General information	75
5.2	Adhesion chart	76
5.3	Polyester putties	77-80
5.4	Spreaders & accessories	81

GENERAL INFORMATION

UNIVERSAL APPLICATION ON A WIDE RANGE OF SUBSTRATES

- Perfect adhesion and very high flexibility
- Quick and easy mixing, no separation in the can, beautiful homogeneous structure
- Easy to apply, does not sag, no air bulbs or pinholes
- Fast curing with minimal shrinkage, both for air and I.R. drying
- Perfectly sandable, both mechanically and manually

USER INFORMATION

- Mix your putty with 2 - 3% hardener; when in doubt, use a scale.
- Too much hardener causes not only a fast drying, but can also cause detachment of the putty and can leave marks throughout the paint.
- Mix the hardener very carefully with the putty and avoid air infiltration during mixing, this can give irregularities during application and sanding of the putty (press out the air during mixing).
- Always mix on a flat non-porous surface to avoid loss of resin, use the GAP 60 mixing board.
- Maximum thickness of the putty should be 3mm. When more thickness is necessary due to bad panel beating, apply the putty several times.
- Never wet sand your putty.
- Choose the right putty for the right application. Check our handy adhesion chart!

GOOD TO KNOW

30-40% Polyester

Polyester putties usually contain 30-40% polyester resin that is amine-accelerated.

(Exo)therm

Polyester resins are thermosetting and, as with other resins, cure exothermically.

Hardening

Hardening occurs by adding 1-5% BPO hardener (usually 2-3%).

BPO hardener: Benzoyl Peroxide (red)paste. Due to the red colour, it is easy to mix the putty evenly.

Mineral fillers/pigments

Putties also contain mineral fillers and pigments. This includes talcum and titanium dioxide and aluminium powder. For our light putties we also use glass beads as inert filler material.

ADHESION CHART

Take a look at our adhesion chart on the next page! The chart gives you a perfect overview of which putties work best on which type of surface (commonly used in automotive).

GAP 51

DEB 51

**GAP 51/ DEB 51
HARDENER**

**GAP 10
POLYESTER PUTTY MULTI**

2kg
+ hardener

- Universal 2K polyester putty
- Maximum stability on vertical surfaces
- High filling power
- Fine grain composition
- No cracking on the edges by fine sanding
- Can be finished afterwards with FINE putty or directly with primer or filler.
- Less suited for light metals and galvanized bases.

Colour: off white
Hardener: BPO red
Mixing ratio in %: 2

**GAP 20
POLYESTER PUTTY FINE**

2kg
+ hardener

- Fine finishing putty. To be used after "MULTI" putty to remove small irregularities.
- To be applied in thin and very thin coats
- Bright white pigmentation
- High filling power
- A real 'finishing' putty
- Easy to apply and sand
- High elasticity
- To fill pin holes, small irregularities, small paint damages or scratches
- No sinking of the top coat

Colour: bright white
Hardener: BPO red
Mixing ratio in %: 2

POLYESTER PUTTIES

Polyester putties

1,5kg
+ hardener

GAP 30 POLYESTER PUTTY LIGHT

- Universal light putty
- Extreme adhesion on metal surfaces
- High stability in the tin
- With glass balls as filling material
- Low shrinkage ratio
- Vibration-resistant and more flexible on thin metal
- Same applications as "MULTI" putty, but results in the same fine finish as "FINE" putty
- Combines excellent sanding properties, with an absolutely compact surface
- Easy sanding
- Extreme adhesion to a variety of substrates such as steel, E-coat, galvanized steel, glass fibre reinforced plastics (GFK) and wood
- Short drying time
- Specific weight 1.5 kg/L

Colour: green

Hardener: BPO red

Mixing ratio in %: 2

3kg
+ hardener

GAP 33 POLYESTER PUTTY EXTRA LIGHT

- Universal extra light finishing putty
- Good adhesion on metal surfaces
- Low shrinkage ratio
- With pvc microbeads as filling material
- Same applications as "MULTI" putty but results in the same fine finish as "FINE" putty
- Combines excellent sanding properties, with an absolutely compact surface
- Easy sanding
- Good adhesion to a variety of substrates such as steel, E-coat, galvanized steel, glass fibre reinforced plastics (GFK) and wood
- Short drying time
- Specific weight 1 kg/L

Colour: green

Hardener: BPO red

Mixing ratio in %: 2-3%

Visual aid during application

Built-in sanding guide

GAP 00
BLACK POLYESTER PUTTY GAPOL

2kg
+ hardener

- Black universal polyester putty
- Similar to "MULTI" putty but black colour
- Universal adhesion on old painted surfaces, steel, light metals, galvanized steel, aluminium, wood and MDF
- Perfect to finish plastic repairs
- Visual aid during application (black shining filler); makes it easy to see all irregularities & imperfections
- Built-in sanding guide: during sanding the putty fades from black to dark grey
- The spots that are too low (not sanded) clearly remain black
- Once degreased, the filler regains its deep black colour; inspecting for possible irregularities is easy now.
- Built-in coating guide: whether one finishes with beige or grey filler, once the black colour is covered, one can also be sure of the necessary thickness of the filler coating.
- Built-in sanding through guide: if afterwards one would sand through the putty accidentally, the black base will occur as a sanding-through guide.

Colour: black
Hardener: BPO red
Mixing ratio in %: 1-3

POLYESTER PUTTIES

Polyester putties

GAP 50 POLYESTER PUTTY ALU

2kg
+ hardener

- Polyester putty refined with aluminum particles
- Perfect for use on parts subject to mechanical stress
- Used to fill coarse irregularities, pores and holes
- Good adhesion on iron, steel, aluminum, galvanized substrates and glass fiber reinforced materials
- Good stability on vertical surfaces
- Can withstand temperatures of more than 90°C
- High elasticity
- Good sandability

Colour: aluminium grey

Hardener: BPO red

Mixing ratio in %: 2

DEB 12 DEBRASEL ALSI + HARDENER

1L
+ hardener

- Alsi 12 is a cold metal that can be used as an alternative to fluid tin
- Replaces Pb – Sn
- Exceptional hardness
- Flaky composition lends the product a very high degree of flexibility
- Once fully cured, it resists hydrocarbons (gasoline, diesel fuel) and some acids (battery acid)
- Reshaping of rough edges, wheel casings, doors and roof
- Perfect for repairing light alloy wheels
- The ultimate product for classic car restoration
- Max. heat resistance

Colour: steel grey

Hardener: DEB 51

Mixing ratio in %: 0,5

GAP 40 POLYESTER PUTTY FIBER

1,8kg
+ hardener

- Universal polyester putty with glass fibres to fill up larger surfaces and bigger irregularities
- Impregnated fibres for easy and equal spreading and finishing
- Perfect for polyester applications and repairs
- For bridging of cracks, small holes and rusted-through areas
- Waterproof; ideal for boat & marine repairs
- Good adhesion on glass fibre reinforced materials
- High stability
- Limited sandability

Colour: light grey

Hardener: BPO red

Mixing ratio in %: 2

MIXING BOARD

Multi-layered mixing palette board (100 sheets) for better mixed putty. It is better to use this board instead of mixing the putty with its hardener on the palettes themselves to prevent pin holes during application. Made of non-absorbing treated paper to avoid resin and hardener to be soaked up by the paper. Reduces cleaning: after use, simply tear off the used sheet and throw it away.

BONDING, SEALING AND PLASTIC REPAIR

Increasingly more, traditional joining processes in the maritime or automotive industry are replaced by bonding technologies. The arrival of new synthetic materials and lighter metal alloys require new and adapted repair procedures.

Finixa offers a wide range of adhesives and sealants especially developed for the professional repair shop; versatility, problem-solving, time saving, ease of use and environmental friendliness are the parameters in the development of our products.

Also take a look at our plastic repair technology. The ultra-fast and cost-effective curing times combined with an ease of use and extreme adhesion make this the absolute first choice of every professional.

BONDING, SEALING AND PLASTIC REPAIR

6.2	Bonding	86
6.3	Sealing.....	87
6.4	Accessories	88
6.5	Metal bonding	89
6.6	Plastic repair	90-91

GENERAL INFORMATION

BONDING

In the bonding area our product range includes:

2-component self-mixing epoxy-systems for structural metal bonding

1-component adhesive based on the latest MSP technology for bonding and sealing

Double sided foam tapes with acrylic adhesive

Contact adhesive in easy to use spray can

Instant gel adhesive for universal bonding and problem solving

SEALING

1-component sealers based on the latest MSP-technology for application with standard cartridge gun and finished by brush or in sprayable version
 Sealer on a roll for easy and fast application without drying time

PLASTIC REPAIR

Our plastic repair system “PLI” is a professional 2-component, self-mixing PU-system.

Use:

super fast bonding of different types of material
 repairing of plastic material

Choice of 3 different curing times depending on the application.

TSP 1100 CONTACT GLUE

- Extremely versatile, fast-drying spray adhesive that bonds to a wide range of materials
- Professional, industrial strength
- High initial strength
- High strength, fast, contact type adhesive
- Bonds laminate, wood, metal, plastic and more

MSA 100 MS FAST ADHESIVE

MS fast adhesive is a universal sealant and adhesive based on hybrid technology for the professional user which cures under influence of humidity to form a durable elastic rubber.

- Durable, permanent elastic
- Universal bonding and sealing
- Adheres perfectly without primer on most even damp surfaces
- Free of isocyanates, solvents and silicones
- No shrinkage and bubble free
- Good UV resistance
- Neutral curing, almost odorless
- Non corrosive to metals
- High mechanical resistance strength
- Absorbs acoustical and mechanical vibrations
- Paintable with most common 1 and 2k paints

IAG 20 INSTANT ADHESIVE GEL

- Instant adhesive gel provides a rapid bonding of a wide range of materials (metals and plastics and others). Can also be used to bond porous materials such as wood, paper, leather and fabric.
- Can be used on all surfaces
- Medium viscosity
- 1k-product
- Cures at normal room temperature
- Designed for OEM assembly

DZB 04-25 DOUBLE SIDED TAPE RED

- Acrylic adhesive base tape.
- Strong initial contact; offers superior adhesion at any given temperature.
- In order to get a 100% adhesion, make sure the surface is properly degreased before application.
- The advantage of this unique acrylic tape is that the initial strength after 2 minutes is 80% of the total, whereas traditional double sided foam tape requires 12 to 24 hours to reach the same strength.

Available sizes:

4mm, 6mm, 9mm, 12mm, 15mm, 19mm, 25mm

**ESS 08-10
SEAM SEALER ON A ROLL**

- OEM profile.
- Can be applied quickly and easily.
- Heat resistant and can be overpainted immediately.

**ESS 20
ROLLER FOR EASY SEAM SEALER**

- Hand roller for applying seam sealer ESS
- Provides constant and even pressure
- Ensures better adhesion

290 ml

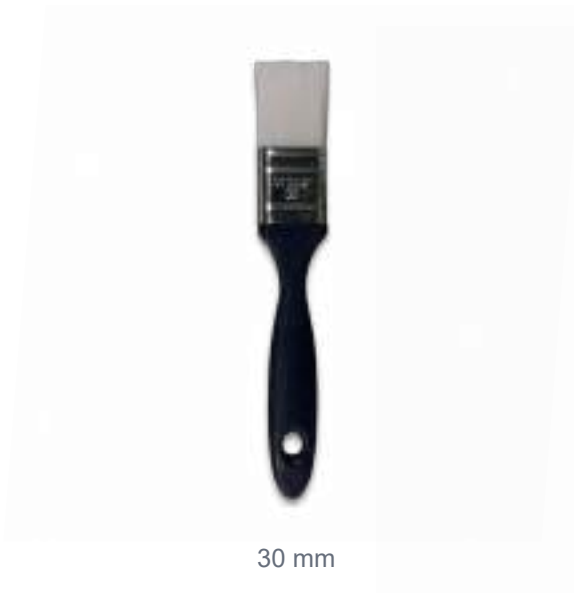

**SSS 100-200-300-400
SPRAYABLE SEAM SEALER**

- MS Polymer
- Firm-setting sealer for interior and exterior seams and joints.
- Replaces and repairs factory sealing jobs.
- No primer needed, good adhesion, lasting flexibility.
- Atomised, using a pneumatic caulking gun, the seam sealer can be used inside door skins, inside panels, or any area where a sound deadening and/or structured coating is needed.
- Standard 290ml cartridge, fits in all standard caulking guns.
- Available in white, grey, black and beige color.
- Paintable after 30 minutes with any water-based or solvent-based primer, basecoat or topcoat.

50mm x 300mm

30 mm

10 p.

100 p.

FOL 62 LOGO TAPE

- Adhesive transfer with dimensions 50mm x 300mm for re-fixing logos / emblems on to the panel.
- Clean surface and logo with degreaser, remove cover strip, press the logo down on the adhesive transfer for several seconds and remove adhesive transfer.
- The logo now has enough adhesive in all the right places to be attached permanently to the body work.

SSS 030 FINIXA BRUSH

- Semi-rigid nylon brush to apply and structure seam sealers
- Solvent-resistant

SSS 000 SPRAY TIP - STANDARD NOZZLE FOR SSS

- Replacement nozzle for SSS and MSA cartridges
- Standard sealant nozzle

SSS 005 SPRAY TIP - FLANGED NOZZLE FOR SSS

- Creates perfect straight beads up to 13mm wide.
- Cut flange to obtain the precise distance from edge of panel.

PLI 60
APPLICATOR GUN FOR
METAL BONDING

Manual bi-mixer for 220ml 2/1 cartridges

**PLI 55**
MIXER TIPS FOR METAL BONDING

Disposable static mix nozzels for Finixa metal bonding. 10 pieces.

PLI 50
METAL BONDING

- Epoxy based glue developed to bond panels of equal or different materials together. Offers an alternative to welding.
- The solution to bond panels of different composition to one another.
- Can be used as an alternative for welding panels.

PLI 16 CONTOUR CANVAS FOR PLASTIC REPAIR

- Plastic contour release film
- Prevents air entrapment in the adhesive
- To force the bead of adhesive into the groove
- To shape the adhesive closely to the original contour before hardening

PLI 15 REINFORCEMENT CANVAS FOR PLASTIC REPAIR 12CM X 3.6M

- Combination of fiberglass reinforcing tape and release film
- Designed to provide additional strength to the repair

PLI 10
APPLICATOR GUN FOR PLASTIC REPAIR

Manual bi-mixer for side by side 50 ml 1/1 cartridges

PLI 00
PLASTIC REPAIR SET

Complete set in handy case for plastic repair

TSP 600
FOAM IT!

Foam it! is an ammonia-free universal water-based cleaner and degreaser in an aerosol. In contradiction to what is on the market already, Foam it! is not only ammonia-free but leaves, once sprayed, a thin foam layer on the surface. This foam releases all kinds of dirt and grease almost instantly from any surface and wipes off very easily, without leaving any traces. Can be used as a general purpose automotive or domestic cleaner, but is also useful to prepare a surface before painting or plastic repair considering its unique degreasing formula.

See overview on page 35

TSP 030
ADHESION PROMOTER

- Adhesion promoter to be used on most plastics
- Spray one light coat
- Excellent adhesion
- Fast drying
- Paintable after 15 minutes

See overview on page 132

PLI 05
MIXER TIPS FOR PLASTIC REPAIR 50ML 10P.

Disposable static mix nozzels for Finixa plastic repair. 10 pieces.

SANDING

Based on our experience and in cooperation with several paint manufacturers, we have developed a complete program of abrasives adapted to the latest technology in refinishing. With the introduction of environmentally friendly paints, high-solid products, UV-primers, clear coats, water-based paints, anti-scratch coatings, self-repairing clear coats, anti-chip clear coats, etc., the requirements that present day abrasives have to meet, have evolved substantially.

With Finixa abrasives, you do not only get a complete program of different shapes to be used by hand or with a sander, but you get a cost effective product that is fast, sharp and long-lasting in any modern application.

SANDING

7.1	General information	95
7.2	Round abrasives	96-98
7.3	Flat foam pads	99
7.4	Scuff rolls	100
7.5	Sanding cloths	101
7.6	Sanding strips	102
7.7	Specials	103
7.8	Sanding machines & accessories	104-106
7.9	Sanding blocks & accessories	107

GENERAL INFORMATION

QUALITY TESTING

Finixa abrasives are tested extensively before they are introduced onto the market. By using a sanding robot, human error or subjectivity is excluded. The robot applies a constant pressure on the surface and makes the same type of movements. This way, we can objectively measure results and a high quality of Finixa abrasives can be ensured.

WHAT SANDING PAPER IS MADE OF

Stearate

- Prevents loading
- Minimizes the risk of pig tails
- Improves cooling; conducts the heat

Top adhesive

- Organic bonding
- Semi-synthetic bonding
- Temperature resistant synthetic bonding
- Waterproof bonding

Grit

- Flint
- Amaril
- Silicium Carbide
- Aluminium Oxide
- Aluminium Oxide + blue fire process

Backing

- Paper
- Linen
- Fibre
- PVC
- Nylon
- Foam

Base adhesive

- Organic bonding
- Semi-synthetic bonding
- Temperature resistant synthetic bonding
- Waterproof bonding

HOW DO WE CLASSIFY OUR ABRASIVES?

Speed: cutting speed of the abrasive

Durability: longevity of the abrasive under normal use

Anti-clogging: treatment of the sanding paper to prevent clogging

Waterproof: compatibility of the abrasive with water

Sanding pattern: homogeneity of the surface after sanding

FFP 0320-1500
FLAT FOAM PADS 115MM X 115MM

- Holds liquid, so easy to dose
- Easy access to difficult areas with maximum comfort
- No risk of sanding through or leaving behind marks
- Perfect for blending; eliminates the need for unnecessary polishing

Matting becomes an easy, comfortable job with this foam backing pad. The sanding grit is no longer applied on a paper backing but glued directly into the foam. The result is astonishing: faster matting than with traditional scuff roll solutions, finer than with foam backing abrasives, more flexibility to get access to the smallest corners and water absorbing!

- SBR 20: ultra fine - grey - P1500
- SBR 30: micro fine - gold - P2000

1 kg

POL 70 MATTING COMPOUND

Matting compound is a composition of liquid chemicals and abrasives intended for surface preparation prior to the blending and painting of new panels. It is suited for any type of paint including waterborne. To be used in combination with non-woven cloth, for instance the SOF 20 or SBR 20.

- For all types of paints
- Gives a matt surface
- Easy to apply
- Easy to remove without traces
- Can be used dry or combined with degreaser DGR

SCA 0500-2000
SANDING CLOTH 80MM X 133MM

Sand wet complete surfaces and not only the edges in applications like preparing for blending or polishing, shallow equal scratchpattern, just by hand or on the SAP 01 sanding pad. Moisten with water based degreaser or just water. The cutting power is high, fast, uniformed, long lasting, works up to two times faster than wet sanding paper, more flexible by hand and easier to reach smaller corners, curves and edges; no risk of sanding through or re-works.

P80, P150, P180, P240, P320, P400, P500, P600, P800, P1000

- Sanding paper on roll with foam backing.
- Packed in a handy dispenser box; provides protection from dust and other pollution.
- The sanding paper is perforated; each single sheet (114mm x 125mm) can easily be torn off.
- At the back the paper has a comfortable foam; even pressure during manual sanding.
- Easily adjusts to round, concave or convex shapes.
- Prevents sanding at the edges.
- The foam backing can be used to easily free the sanded surface from sanding dust.

MASKING

Masking tape, paper and film are the key products for masking boats, cars or any other vehicle with professional results. A good masking job will result in a superior, clean finish once the painting process is complete. Masking requires time and attention to detail. Finixa offers a wide range of professional masking products that will save you a lot of time and guarantee a top finish.

Before you start masking, make sure the boat is free of dust and degreased for maximum adhesion and a good end result.

GENERAL INFORMATION

MASKING FILM

A full range of high-quality HDPE, static loaded films for all common masking and covering applications. All films are folded for easy "one man" application.

Types of films available:

- Pink premium masking film: corona treated on the outside, special layer on the inside absorbs humidity on the car.
- Transparent premium and standard film: corona treated, printed to indicate the paint absorbent side.
- Green HDPE film: for covering applications or masking applications in combination with masking paper, not corona treated
- Pre-cut static and corona treated film with integrated masking tape on one side.

LIFTING TAPE

Perforated or non-perforated crepe masking tape in combination with a plastic liner to slightly lift rubber moldings from the body. To avoid sharp paint edges and to protect rubber trims and moldings against overspray.

MASKING TAPE

A full range of high-quality masking tapes with a variety of backings, adhesion strengths, clean removal properties and temperature range performance.

Types:

- Easy-to-tear paper tape with an easily released pressure-sensitive adhesive
- High-performance tapes with superior temperature resistance and high adhesive strength
- Masking tapes for use with solvent and water based paints
- Tapes for general masking tasks or challenging jobs requiring high flexibility and sharp paint-line properties

MASKING FOAM

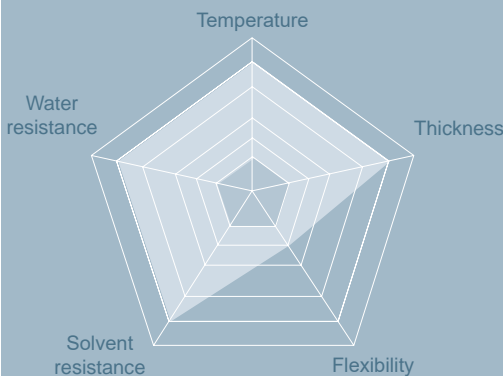

A full range of high-quality masking foams with and without adhesive layer. Round and oval shapes for door jamb masking, rectangular for blending applications and a unique "8" shape for primer applications.

COMPARISON CRITERIA

- **Ripping:** ease with which the tape can be torn by hand
- **Lifting height:** the wider and stiffer the rubber, the higher the lifting height must be
- **Solvent:** resistance level of the tape to solvent-based products
- **Water:** resistance level of the tape to water based products

COMPARISON CRITERIA

- **Temperature:** level of temperature resistance
- **Thickness:** indication of the thickness of the given masking tape
- **Flexibility:** indication of flexibility of the given masking tape
- **Solvent resistance:** level of resistance of the tape to solvent-based products
- **Water resistance:** level of resistance of the tape to water-based products

MASKING PAPER

FOL 43 **PREMIUM MASKING FILM**

- The lilac transparent masking film FOL 43 is not only a good static masking film that holds paint on the exterior of the film, it also has a special layer on the inside of the film that absorbs humidity. This avoids white spots after spraying.
- Excellent paint absorbing on the exterior side (logo side).
- Easily cut.
- Statically loaded: can be applied by 1 person.

Available sizes:
4m x 150m

MASKING

Masking film

CRM 48 STANDARD PAINT ABSORBENT MASKING FILM

- The film has a width of 4,8 m
- Corona-treated transparent film (with Finixa printed on the paintable side) to protect against overspray.
- Statically charged and folded for application by one person.
- Comes in an easy to use dispenser box.
- Can also be mounted on the Finixa EQU 70 masking film dispenser.

Available sizes:
4.80m x 200m

FOL 40-42-45-46 PAINT ABSORBENT MASKING FILM

- HDPE white transparent film printed to indicate the paint absorbent side.
- The film is slightly transparent to facilitate cutting away the surface to be painted.
- Sufficiently static to protect the boat or vehicle from overspray
- Folded in such a way that the film can be unrolled, unfolded and cut by only one person.
- Film has corona treatment for optimum paint absorption.

Available sizes:
4 x 200m
5 x 120m
6 x 150m

CRM 20-40 STANDARD PAINT ABSORBENT MASKING FILM

- Corona-treated, semi-transparent HDPE film with Finixa printed on the paintable side
- Statically charged and folded for application by one person
- Semi-transparent for easy cutout
- Comes in an easy to use dispenser box for dust protection
- Can also be mounted on the Finixa EQU 70 masking film dispenser

Available sizes:
4 x 150m
4 x 300m

PLA 03
HDPE MASKING FILM

- HDPE green masking film is non-paint absorbent and is used only for covering.
- No corona treatment; needs to be combined with masking paper in case used in the spray booth.

Available sizes:
3,8m x 200m

DAE 035-260
EASY TEAR MASKING FILM WITH MASKING TAPE

- Easy to tear static masking film with masking tape.
- Corona treated for optimum paint absorption.
- To be unfolded by right-handed people.

Available sizes:
0,35m x 25m
0,60m x 25m
1m x 25m
1,2m x 25m
1,8m x 25m
2,6m x 25m

MAP B 020-120
MASKING PAPER 40 G/M²

- 40 gr/m² kraft paper
- Pure, not recycled
- One side glossy and therefore paintproof
- Dustfree
- Available in 7 sizes
- 450 m per roll
- Individually packed

Available sizes:
0,2m x 450m
0,3m x 450m
0.37m x 450m
0,4m x 450m
0,6m x 450m
0,9m x 450m
1,2m x 450m

MASKING

Masking film dispenser

EQU 70 **DISPENSER FOR MASKING FILM SINGLE**

- Mobile dispenser for masking film
- Easy to operate by 1 person
- Unroll the film over the boat and cut along the cutter guide with the film cutter
- Saves space in the workshop

Suited for

FOL 43, CRM 48, FOL 40-46, CRM 20-40, PLA 03

EQU 57 **DISPENSER FOR MASKING PAPER**

- Easy, fast and time-saving dispenser for masking paper
- Automatically applies the tape to the paper
- Holds 3 widths of masking paper: 30-60-90 cm
- Toothed blades for easy and straight tearing
- Mobile: equipped with large and stable wheels for easy moving

Suited for

MAP B 020, 030, 040, 060, 090, 120

PLA 52

PLA 55

PLA 50 **STANDARD CUTTER FOR MASKING FILM**

- Film cutter with a fixed blade
- The blade can never come into contact with the bodywork, no risk of damages

PLA 52 **PREMIUM CUTTER FOR MASKING FILM**

- Film cutter with replaceable razor blade
- The blade can never come into contact with the bodywork, no risk of damages
- PLA 55: replacement blades 10 pc.

PLA 55 **REPLACEMENT BLADES**

CUK 00 **CUTTER KNIFE IN STAINLESS STEEL**

- General purpose stainless steel cutter knife
- Standard 9mm replaceable blade
- Sliding knob with lock system
- Includes pocket clip

MASKING

Fine line & duct tape

FOL 303-325 FINE LINE TAPE BLUE

- PVC tape for specific masking tasks such as spraying of multiple colours, art-work or custom painting
- This tape is more flexible than conventional masking tapes
- The excellent adhesive quality makes it possible to mask plastic and rubber
- 7 different widths available
- Unique stretch

Available sizes:

3, 6, 9, 12, 15, 19, 25mm x 33m

TAP 52

TAP 50

TAP 50-52 DUCT TAPE

- Strong but tearable cloth based tape, ideal as a problem solver and very suitable for protecting the bodywork against sanding through paint on an adjacent area.
- Does not leave glue behind after removal.
- Can be handy for towing and transporting a damaged vehicle.
- Available in silver or black.
- High quality.

Available sizes:

50mm x 50m

FOL 51
LIFTING TAPE

- Masking tape with 10mm plastic strip for masking around wind screens. Simply place the plastic strip between rubber and panel and then pull away the rubber from the panel by attaching the tape to the window.
- Easy to cut to size with scissors.

Available sizes:
10mm x 10m

FOL 51ET
LIFTING TAPE 'EASY TEAR'

- Masking tape with 10mm plastic strip for masking around wind screens. Simply place the plastic strip between rubber and panel and then pull away the rubber from the panel by attaching the tape to the window.
- The tape and strips are perforated every 46mm, so they can be torn by hand.
- Always tear from the plastic side to the tape side.

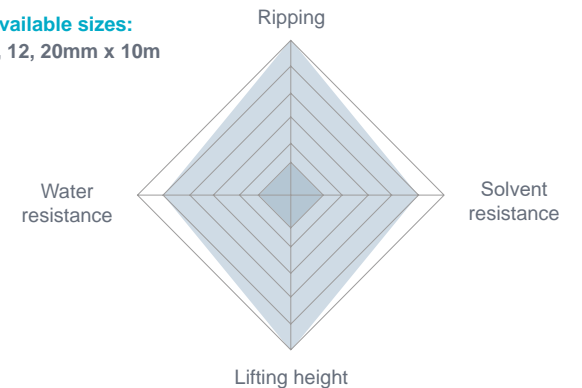

Available sizes:
10mm x 10m

FOL 501MT
LIFTING TAPE 'MULTI'

- Masking tape with two different sized plastic strips for masking various areas of the vehicle. The combination of two plastic strips makes it possible to use one tape for three different applications. Simply place one, two or the two strips folded together between rubber and panel and then pull away the rubber from the panel by attaching the tape to the wind screen.
- The tape and strips are perforated every 42mm, so they can be torn by hand.
- Always tear from the plastic side to the tape side.

Available sizes:
9, 12, 20mm x 10m

MASKING

Masking tape

MST 919-950

MASKING TAPE 100 °C

- High-quality masking tape
- Can be used with all paints, mainly with solvent-based paints
- Excellent adhesion on most surfaces
- Suited for IR and UV drying
- Heat resistant: 10 minutes at 100 °C, 30 minutes at 80 °C, 60 minutes at 60 °C
- Thickness: 0,125mm
- Adhesive strength on steel: 4,3 N/25mm

Available sizes:

19, 25, 30, 38, 50mm x 50m

MST 519-550

MASKING TAPE 110 °C

- Professional high-quality masking tape
- Can be used with all paints, mainly with solvent-based paints
- Excellent adhesion on most surfaces
- Suited for IR and UV drying
- Heat resistant: 10 min. at 110 °C, 30 min. at 100 °C, 60 min. at 80 °C
- Thickness: 0,130mm
- Adhesive strength on steel: 4,5 N/25mm

Available sizes:

19, 25, 30, 38, 50mm x 50m

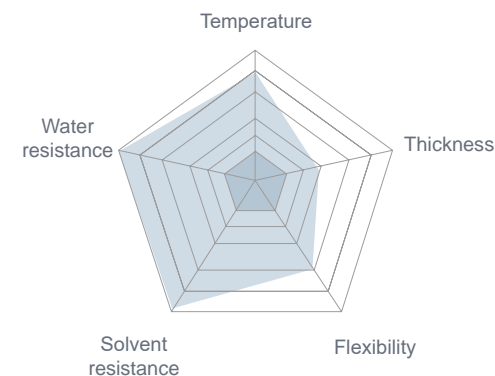

MST 719-750

MASKING TAPE 120 °C

- Entirely saturated masking tape of high adhesive strength
- Can be used with all water- and solvent-based paints
- Easily removable
- Excellent adhesion on most surfaces
- Solvent- & water-resistant
- Suited for IR and UV drying
- Heat resistant: 10 minutes at 120°C, 30 minutes at 90°C
- Thickness: 0,130mm
- Adhesive strength on steel: 4,8 N/25mm

Available sizes:

19, 25, 30, 38, 50mm x 50m

MST 619-650
MASKING TAPE 140°C

- Entirely saturated masking tape with very high adhesive strength
- Can be used with all water- and solvent-based paints
- Easily removable
- Excellent adhesion on most surfaces
- Solvent- and water-resistant
- Suited for IR and UV drying
- Heat resistant: 10 minutes at 140°C, 30 minutes at 120°C
- Thickness: 0,140mm
- Adhesive strength on steel: 5 N/25mm

Available sizes:

19, 25, 30, 38, 50mm x 50m

MST 819-850
MASKING TAPE GOLD 100 °C

- Masking tape of the new generation
- Can be used with all water- and solvent-based paints
- Solvent- and water-resistant
- Excellent adhesion on all surfaces, also on plastic and rubber
- More flexible than traditional masking tape
- Ultra thin carrier; Japanese flat paper (rice paper)
- Can easily be used in soft curves and can replace fine line tape
- Saves a considerable amount of time during disassembly and assembly
- Never leaves traces of glue, not even on polycarbonate
- Heat resistant: 30 minutes at 100 °C
- Thickness: 0,09mm
- Adhesive strength on steel: 4,8 N/25mm

Available sizes:

19, 25, 30, 38, 50mm x 50m

FOR MORE INFORMATION,
CHECK OUT OUR VIDEO ON:
WWW.FINIXA.COM/EN/VIDEOS

SPT 13-17 SPON TAPE - ROUND

- Round shaped foam strip for masking joints between two panels.
- One side of the strip has been treated with heat resistant adhesive.
- Simply stick the tape on the inside of one of the panels and close the other panel.
- Protects the joint perfectly, absorbs the paint and avoids edge building.

SPT 25 SPON TAPE - OVAL

- Oval shaped spon tape to protect joints during paint work
- Unlike the traditional spontapes, SPT 25 is put on the moving part of the joint
- The paint never comes in contact with the glue layer
- The tape can still be repositioned for a perfect finishing after closing the door
- Foam is perfect to use with fade-out spraying, without edge forming

SPT 05 FLEXI 'NO EDGE' BLENDING TAPE

- Foam tape helps blending out clear coats and 2K topcoats
- Can be used to avoid edge forming by applying primers
- Saves time when sanding primers and polishing clear coats
- Flexible application, also on round forms
- Easy to use for masking curves
- TIP: remove before drying to avoid glue residue

JST 15-22
JOINT STOPPER

- The easiest and fastest way to mask apertures and other vehicle gaps before primer application
- Seals and protects jambs from overspray
- No primer build-up on panel edges
- Precise fingertip adjustment
- Unique 8-shape, stays fixed during spraying
- Easy to remove, no glue
- Remove while the primer is still wet to obtain a soft feathered edge
- Reduces process times to a minimum
- Available sizes: 15mm x 35m & 22 mm x 25m

JST 15
15mm x 35m

JST 22
22mm x 25m

FINIXA
SOLVENT-FREE CLEANER

Cleaner for UV primer
400 ml

TECHNICAL SPRAYS

Aerosol spray cans are a fast, easy, time saving and cost-effective way to apply paint-like products.

Finixa offers a wide range of technical sprays to help the repairers in nearly every step of the metal repair process; from corrosion protection to primers and fillers for the preparation area and clear coats and lacquers for the paint shop.

Finixa technical sprays give you a professional application and finish, especially for smart and spot repair.

TECHNICAL SPRAYS

- 9.1** General information 127
- 9.2** Technical spray cans 128-135

GENERAL INFORMATION

CATEGORIES OF AEROSOLS

On the following pages our aerosols are categorized according to their use in the metal repair process. In which step the aerosol is to be used, can be recognized by one of the following pictograms: metal work, paint preparation and paint.

METAL WORK:

Corrosion protection and weldability are the key words for metal repairs. Zinc spray for metal protection and weld-through primers to protect different types of welded joints before and after the welding.

PAINT PREPARATION:

Here the main application is priming and filling.

2 K polyester spray putty and primer filler, but also the latest technology in UV primers and easy to use sanding guides as aerosols as well as anti-gravel protection.

PAINT:

In this area we offer different paints for touch-up and repair applications.

2K clear and fade out thinner, specially developed for smart and spot repair, control spray for exact colour matching and prefill spray cans for water- and solvent-based paints.

USER INFORMATION

Finixa technical sprays

Make sure can and surface are at room temperature (between 15 - 35 °C)

Preferably, the surface is sanded (Grain P280-P400)

Only apply the aerosols on clean and dust-free surfaces (degrease with DGR first)

Be sure to shake the can before use (min. 1 minute)

Apply thin layers from a distance of 20-30 cm

We advise to apply several thin layers crosswise (in stead of 1 heavy layer)

Respect flash-off times between layer applications

After use, turn the can upside down and spray until only propellant comes out

Do not coat with PE or EP products

REPLACEMENT NOZZLES

For most types of technical sprays, replacement spray nozzles are available. What type of nozzle is suited, is indicated per aerosol on the following pages. All nozzles are packed per 10 pieces.

- **TSP 1XX** Nozzle for aerosols TSP 1XX and TSP 3XX
- **TSP 2XX** Nozzle for aerosol TSP 2XX
- **TSP 4XX** Nozzle for aerosol TSP 4XX
- **TSP 5XX** Nozzle for aerosol TSP 5XX
- **TSP 9XX** Nozzle for aerosol TSP 9XX
- **TSP 10XX** Nozzle for aerosol TSP 10XX
- **TSP 11XX** Nozzle for aerosol TSP 11XX

TECHNICAL SPRAYS

Technical spray cans

400ml

TSP 190 ETCH PRIMER

TSP 1XX

- Etching primer for bare metal surfaces. Provides excellent anticorrosion protection.
- Overpaintable without sanding with any 1K or 2K primer/filler.

400ml

TSP 530 WELD THRU PRIMER - COPPER

TSP 5XX

Acrylate resin based copper anti-corrosion primer offers rust protection for SPOT, MIG & TIG welding applications. High concentration of copper in the dry film in a fast drying formulation to speed up the welding process with limited impact on the weld. Has excellent adhesive properties. The product can be used before and after welding. Copper primer can be painted over with most types of lacquer systems.

400ml

TSP 810 WELD THRU PRIMER - ZINC PHOSPHATE

Alkyd resin based zinc-phosphate anti-corrosion primer offers rust protection for SPOT, MIG & TIG welding applications. High concentration of zinc in the dry film in a fast drying formulation to speed up the welding process with limited impact on the weld. Has excellent adhesive properties. The product can be used before and after welding. Zinc phosphate primer can be painted over with most types of lacquer systems.

TSP 150
UV PRIMER

TSP 1XX

- A one-component UV curable primer- filler
- 2 minute cure
- No mixing
- Increased productivity
- For use on properly cleaned and sanded steel, aluminum, galvanized steel, cured and sanded OEM finishes, polyester body fillers, rigid and semi-rigid plastic, ...
- Perfect for spot and smart repair

400ml

TSP 1200
UV PRIMER CLEANER

- Especially formulated for UV primer
- To be used after curing and before sanding
- Increases the life span of the abrasive material
- Can also be used to remove non-cured UV primer

 TSP 320

 TSP 310

400ml

TSP 210-230 ANTI-GRAVEL

Anti-gravel is available in light grey and black, supplied with a round thick spray jet to apply the viscous product in thicker layers. To get a composition of layers: apply layers crosswise at a distance of 35cm. Shortening the distance provides a more glossy result. Can be painted with all 1 and 2K paints.

AGB 01 - AGG 01 ANTI-GRAVEL COATING

- Solvent-based chip protection in grey or black colour. Flexible, good adhesion.
- Anti-gravel coating based on synthetic resins and rubbers
- Fast drying, can be applied drip-free
- Excellent rust protection
- Can be painted over with any kind of paint

TSP 310 - 320 SANDING GUIDE

- Black & fluo green
- Unique product! Thanks to unique composition this sanding guide can be sanded after 3 seconds at 20°C without filling the sanding paper. Contrary to most comparable products in the market this product causes no extra abrasive consumption. Available in black and green.

150g

CPS 150
CONTROL POWDER

Control powder is used to detect imperfections. The powder will allow the operator to achieve a perfect flatness of the surface and body contours equal to the original ones. In the repair process, the powder is used prior to application of the base coat. Contains 150 g.

400ml

TSP 030
ADHESION PROMOTER

TSP 5XX

- Adhesion promoter to be used on most plastics
- Spray one light coat
- Excellent adhesion
- Fast drying
- Paintable after 15 minutes

TSD 50
MAGNETIC AEROSOL HOLDER

- Now with new pre-mounted magnets on the back.

TECHNICAL SPRAYS

Technical spray cans

TSP 710 2K CLEAR COAT

2K clear coat for the professional user: a SMART repair solution. Apply 2 layers with an interval of 10 minutes to get the perfect spray gun finish, which is scratch free, petrol- and UV-resistant and suffers no weather influences. Isocyanate-free.

250ml

TSP 920 FADE OUT THINNER

TSP 9XX

- Blending solvent to dissolve edges of clear coats making a perfect transition between old and new clear coats. Universal use as it is compatible with all A-brand clear coats. No spray gun needed; so much faster in SMART repair.

TSP 1010

TSP 1000

400ml

TSP 520-525
WHEEL SPRAY

TSP 5XX

- Ultrafine & fine silver spray
- Two aerosols completing the program, two alloy silver colour repair tools, one is medium bright and fine, the other is very bright and ultrafine.

TSP 910
MATT BLACK

TSP 9XX

Black matt paint for quick plastic repair or to cover up overspray on plastic inner parts in a fast and easy way.

TSP 1000-1010
HIGH GLOSS

TSP 10XX

- Fast-drying, high-quality, professional topcoat
- High gloss
- Easy application, constant atomization pressure
- Good surface hardness
- Resistant to petrol, chemicals and weather influences
- Non-fading and UV resistant.
- Very good polish ability
- Available in black and white

TECHNICAL SPRAYS

Technical spray cans

400ml

TSP 180 1K CLEAR COAT

- Fast drying, high-quality professional 1K clear coat in aerosol
- Easy application, constant atomization pressure
- Very good flow
- High gloss level
- Good surface hardness
- Resistant to petrol, chemicals and weather influences
- Non-fading and UV resistant.
- Very good polish ability
- No colour deviation
- Easy to fade out with TSP 920 fade-out thinner

400ml

TSP 550 STRUCTURE SPRAY

- Special product to repair the texture on plastic parts
- Choice of structural finishes
- Easy to use
- Dries very quickly
- Can be painted over with all conventional 1K basecoat and 2K topcoat systems

TSP 5XX

400ml

TSP 930 CONTROL SPRAY

- The temporary gloss layer of the Finixa control spray replaces the clear coat without leaving any trace on the surface.
- Spray a thin layer on a sample plate (that is sprayed with a basecoat) to create a temporary shine. Compare the sample plate with the desired color for inspection.
- TSP 930 is also the perfect tool to detect imperfections. The gloss layer works as a magnifying glass and it will detect errors faster and easier. Finixa control spray evaporates completely after use without leaving any residue on the sprayed surface.

TSP 9XX

400ml

250ml

400ml

**TSP 410
ZINC SPRAY**

TSP 4XX

- This zinc spray can be used to temporarily protect naked metal before or after welding, can also be used for spot welding, paintable with all 1 and 2K paints, solvent and water based paints.
- Contains 85% zinc.

**TSP 720
2K SPRAY PUTTY**

Fast drying high-build 2K polyester spray putty.
A SMART repair solution:

- Fast drying, sandable after 1 hour curing at 20°C and normal humidity.
- High-build capacity up to 100µm in 3 layers (leave flash off 5' between layers).
- Excellent adhesion on bare metal, galvanized substrates and sanded old paint jobs.
- Can be sprayed over with all common 1K base- and 2K topcoat systems on the market.
- Isocyanate-free.

**TSP 110-140
PRIMER/FILLER**

TSP 1XX

- Universal primer/filler in white, light grey, grey and dark grey suitable to finish with all solvent and water based 1K and 2K paints. Can be applied on all surfaces, ideal for fast repairs after sanding too hard. Also ideal for spot or panel repair, especially for smaller surfaces. Apply fine layers.
- If you desire a thick layer: first apply 1 full layer at a distance of 30-35cm and afterwards finish with a crosswise layer at a distance of 20cm.
- All primer/fillers sprays have a special nozzle which sprays a flat vertical pattern, comparable to a spray gun. Primer with a high viscosity: shake the can very well before the first use.

SPRAYBOOTH MAINTENANCE AND PROTECTION

Finixa offers a complete line of washable and strippable coatings that provide an economic alternative to labour intensive spray booth scraping and cleaning. There is no bigger investment in a repair shop than the paint booth. And the booth is where the final, most visible step in the repair process takes place. A properly maintained paint booth can mean the difference between success and failure for a repair shop.

SPRAYBOOTH MAINTENANCE AND PROTECTION

10.1	General information	139
10.2	Cleaning	140
10.3	Dust control	141
10.4	Protection	142-145

GENERAL INFORMATION

CLEANING

All our products for spray booth maintenance are water-based, biodegradable and environmentally friendly. Our cabin clean is a biodegradable, water-based paint solvent, it is VOC-free and safe to use.

2004/42/EG

VOC compliant

Volatile organic compounds (VOCs) are organic chemicals that have a high vapor pressure at room temperature. VOCs are regulated by law to minimize the environmental impact. Products labelled 'VOC compliant' comply with these set regulations.

DUST CONTROL

Unique liquid specially developed to reduce dust by ionization. Dust control is the most original and efficient formula for suppressing dust circulation by ionizing the dust so it is being drawn together in clusters which makes it too heavy to circulate in the air.

PROTECTION

For the protection of your spray booth you can choose whether you want to protect your spray booth with a liquid product that is washable or peelable, or with a protective film that can be easily replaced and disposed of.

Washable and strippable coatings are an easy way to keep your spray booth free from the dangerous accumulation of combustible paints and solvents.

Our premium, water-based coatings are easily applied to walls, windows, and lights.

At the end of their service life you wash down (washable coatings) or simply peel off (strippable coatings) the contaminated coating.

For the washable coating you have the choice between a sticky and a non-sticky version.

Our booth mask wall protection film is very easy to apply and we also offer transparent protection film for the windows and lights.

CBC 05 CABIN CLEAN PAINT DISSOLVENT

- Biodegradable paint solvent
- Water-based
- VOC-free
- Apply the product with a brush or roll, let it rest for 5 to 15 minutes and then remove with a rag
- Rinse with water
- Dissolves both water-based and solvent-based 1 and 2K paint products
- Useful to remove dried remaining paint on spray guns, paint mix tables, mixing room, floor and spray booth walls
- Warning: always test on a small surface first

**DUC 05-10-25
DUST CONTROL**

- The most original and efficient formula for suppressing dust circulation inside a spraybooth, workshop and warehouse. Dust Control ionizes the dust so it is being drawn together in clusters which makes it to heavy to circulate in the air. Mist economically with pressure sprayer.
- Biodegradable.

Number of layers (min-max): 1/1

Coverage: 80m² / L

Drying time: 15 min.

Removal: not applicable, the product works 7-14 days

Application:

- Make sure the surface is dry
- Apply with a pressure sprayer - fill the pump to 3/4
- Atomize the product lightly but regularly

**DUC 50
FINIXA DUST CONTROL PRESSURE SPRAYER**

- Designed for dust control application
- 5l manual pressure sprayer
- Adjustable spray nozzle, trigger lock
- Pressure release valve

CBP 05-10-25 CABIN WALL PROTECTION WASHABLE - PRO

- Transparent, tacky and washable coating for the protection of spraybooth walls against overspray. Product stays tacky in order to hold on to swirling dust.
- Apply one thick layer by means of a pressure tank, airmix or airless pump in 1 thick layer.
- Remove afterwards with water and sponge.
- Biodegradable.
- Remove or apply another coat when the product is no longer tacky.
- Average consumption per spraybooth: 12L.
- Depending on temperature and humidity, the product will stay tacky for 10-12 weeks.

Number of layers (min-max): 1/3

Coverage: 10m²/L/layer

Drying time: 15 min. 60°

Removal: water and sponge - high-pressure washer

Application:

- Paint roller: no dilution
- Spray gun: needle 2.5
- Pressure tank: 2.0 - no dilution
- Airless: tip 515-0.015" - no dilution

CBP B 05-10-25 CABIN WALL PROTECTION WASHABLE - BASIC

- Transparent, tacky and washable coating for the protection of spraybooth walls against overspray. Product stays tacky in order to hold on to swirling dust.
- Apply with spray gun (2.5) in two or three coats. The thicker the total coat, the longer it stays active. Applying another coat after some time will re-activate the product.
- Remove afterwards with water and sponge.
- Biodegradable.
- Remove or apply another coat when the product is no longer tacky.
- Average consumption per spraybooth: 15L.
- Depending on temperature and humidity, product will stay tacky for 6 - 8 weeks.

Number of layers (min-max): 2/4

Coverage: 8m²/L/layer

Drying time: 15 min. 60°

Removal: water and sponge - high-pressure washer

Application:

- Paint roller: no dilution
- Spray gun: needle 2.5
- Pressure tank: 2.0 - no dilution
- Airless: tip 515-0.015" - no dilution

CLM 05 LIQUID MASKING WALL PROTECTION - WASHABLE

- Originally designed to protect vehicles against overspray.
- About the same application as Cabine Protect transparent washable coating with the difference that this product dries completely and does not stay tacky.
- Apply with spraygun (2.5) in one thick coat. Remove with water and sponge.
- Biodegradable.

Number of layers (min-max): 1/3

Coverage: 15m²/L/layer

Drying time: 15 min. 60°

Removal: water and sponge - high-pressure washer

Application:

- Paint roller: no dilution
- Spray gun: needle 1.5
- Pressure tank: 1.8 - no dilution
- Airless: tip 513-0.013" - no dilution

FOR MORE INFORMATION,
CHECK OUT OUR VIDEO ON:
WWW.FINIXA.COM/EN/VIDEOS

CPP 17
CABIN PROTECT WALL PROTECTION - PEELABLE

- White, peelable coating for the protection of spraybooth walls against overspray.
- Apply with a spraygun (2.5) in 2 to 3 coats.
- After contamination, it is best to put an extra coat on and repeat, this will save time and makes it easier to peel off the coating in one piece once it has reached a certain thickness.
- Biodegradable.

Number of layers (min-max): 2-15

Coverage: 5-6m²/L/layer

Drying time: 15 min. 60°

Removal: peeling

Application:

- Paint roller: no dilution
- Spray gun: needle 2.5 - dilution max. 3% water
- Pressure tank: 2.0 - no dilution
- Airless: tip 619-0.019" - no dilution

PLA 32 BOOTHMASK WALL PROTECTION FILM

- Static and paint absorbent white film cut to size in order to be used to protect spraybooth walls against overspray.
- The unique folding of the film makes it much easier and faster in application. Unroll the foil directly on the cabine wall over the complete lenght and add a magnet in the middle of the foil. Just unfold the foil up and down and add the additional magnet and the cabine is ready.
- Easy to remove.

PLA 45-4525 MAGNET STRIP PLIABLE/CUTTABLE

CPF 10-11 CABIN LIGHT PROTECTION FILM

- A high-tack transparent masking film for interior and exterior use with a water-based acrylic adhesive and a U.V. inhibitor.
- Transparent adhesive film to protect the lighting fixtures inside a spraybooth with a minimum loss of lighting intensity
- Does not leave glue residue after removal
- Can also be used to cover broken wind shields

PRF 600-1200
SELF-ADHESIVE PROTECTION FILM - WHITE

- A white polypropylene adhesive film, designed to protect any kind of surface from chemical products
- To protect mixing tables and floors from getting contaminated by overspray, paint spill, oil, etc.
- Skid proof, even wet, due to grain particles in the film
- Acrylic adhesive layer
- Clean removal, no residue up to 10 days
- White colour for optimal light reflection
- Good dimensional stability and flatness
- Low electrostatic charge
- Good barrier to water vapor
- Resistant to oils and greases
- Good puncture, flex and crack resistance

GLP 09-10
PVA GLOVES RED

Red
1 pair

- Reusable, long PVA (Polyvinylalcohol) gloves with cotton interlock lining to offer maximum protection against chemicals.
- For handling strong organic solvents.
- Unlimited protection against solvents.
- Length of the gloves: 355mm.
- TIP: when you feel cold through the gloves while using them in combination with solvent products, you have to replace the gloves even if they don't show any holes. The solvent will come through the gloves and will penetrate human skin and body.

S 07	M 08	L 09	XL 10	XXL 11
---------	---------	---------	----------	-----------

GLC 08-10
NITRILE GLOVES GREEN

Green
1 pair

- Reusable, long nitril gloves that offer minimal protection against chemicals.
- Ideal for cleaning, recycling or coagulating jobs.
- Minimal protection against solvents (+/- 10 minutes).
- Length of the gloves: 330mm.
- TIP: when you feel cold through the gloves while using them in combination with solvent products, you have to replace the gloves even if they don't show any holes. The solvent will come through the gloves and will penetrate human skin and body.

---------	---------	---------	----------	-----------

GLQ 08-10
KETONE RESISTANT GLOVES BLUE

Blue
1 pair

GLQ is made from a unique formulation which provides exceptional protection against a wide range of aggressive solvents. It offers excellent resistance to ketones, including MEK and acetone, as well as aromatics such as toluene. The performance level is equivalent to our GLP but due to the lightweight unsupported glove construction it feels like a second skin resulting in greater tactile sensitivity which reduces hand fatigue. Length of the gloves: 320mm.

TIP: when you feel cold through the gloves while using them in combination with solvent products, you have to replace the gloves even if they don't show any holes. The solvent will come through the gloves and will penetrate human skin and body.

Washable at 30°C

Anti-static EN1149:1

PHO 07-11

HIGH TECH SPRAY OVERALL

- A new revolutionary technology.
- The only washable overall on the market that gives 100% protection during the application of high solid paint products.
- The front is a Teflon-treated polyester fibre that protects against paint penetration.
- The back is completely made of multi dry woven material.
- Multi dry absorbs all the perspiration of the body and vaporises this humidity into the air (from the head, back, armpits, back of the knee).
- Very comfortable to wear.
- The overall has two large side pockets and one breast pocket.
- It also has shoe protection.
- Centred waist band for comfort.
- Washable at 30 °C, up to 10 times.

Biodegradable packaging

Anti-static EN1149:5

Washable at 30°C

CARBOTEC OVERALL & SPRAY COAT

Carbotec models are completing our overall program as highest standard available on the market: Carbotec technology comes in overall or spray coat; made of lint-free & silicone free polyamide filaments in addition, the fabric is woven with 2% carbon fibre to avoid any electrical charging (EN1149). The original DuPont Teflon coating ensures that the overall is dirt- and water-repellent. The AVS ventilation system will guarantee the wearer excellent breathability. The Carbotec offers a high degree of process reliability.

TCC 07-12
TEFLON® CARBOTEC SPRAY COAT

EQUIPMENT

Panel stands & Trestle

EQU 80 SPARE PART CART

- Keep your parts organized for each job in the handy chariot.
- 2100x650x900mm
- 230kg max.

EQU 50 BUMPER STAND

- Mobile stand for storage of car bumpers or wooden panels.
- Equipped with 8 adjustable supports all cushioned for safety.
- Dimensions (lxwxh) packed: 123cm x 31cm x 20cm.
- Weight: 25kg.

EQU 52 WHEEL AND PANEL STAND

- Mobile panel stand with two horizontal supports (with two car wheel supports on each side).
- The wheel supports can be taken off so the stand can be used for larger wooden or metal panels - horizontal supports are foam-cushioned for safety.
- Dimensions (LxWxH) packed: 91cm x 70cm x 15cm
- Weight: 27kg

EQU 64 PORTAL ROTATING PANEL STAND

- Mobile panel stand with rotating central axis that can be locked under different angles into different positions by means of a foot pedal.
- Supplied with extensions for the axis so that two doors can be fitted one next to the other, 4 vertical supports with hook and 2 supports with holes.
- Dimensions (LxWxH) packed: 149cm x 23cm x 16cm
- Weight: 26kg

EQU 53
BUTTERFLY TRESTLE PREMIUM

- Folding trestle that can be adjusted in height and width by means of two chains.
- Premium quality, feet are attached by means of an extra bar.
- Dimensions (LxWxH) packed: 107cm x 32cm x 9cm.
- Weight: 8,5kg

EQU 55
X-TRESTLE

- Adjustable trestle with locking system on the axis for different positions.
- Jumbo X-trestle is galvanized and has a metal axis locking system and two bumper supports.
- Dimensions (LxWxH) packed: 129cm x 63cm x 11cm
- Weight: 10,5kg

EQU 56
X-TRESTLE

- Adjustable trestle with locking system on the axis for different positions.
- Standard X-trestle is powder coated grey and has a plastic axis locking system.
- Dimensions (LxWxH) packed: 117cm x 48cm x 8cm
- Weight: 5kg

100 cm x 40 cm x 30 cm

AGC 50 QUICK CLEANER

- To clean all waterborne paints.
- No need to leave the spray booth.
- Saves time.
- Cleaning in 30 seconds.
- To be combined with BTC 80 (waterbased gun shampoo).
- Low consumption of gun shampoo, 5 litre for 100 guns.
- Compatible with all disposable cup systems.
- Atex approved.

See overview on page 167

140 cm x 56 cm x 41 cm

AGC 21 AUTOMATIC GUN CLEANER

- To be used in combination with cellulose thinner to clean solvent-paint guns or BTC 80, to clean water-based paint guns.
- Equipped with a brush for pre-cleaning.
- Possible after-cleaning with clean material / air mixture.
- Stainless steel.
- Easy assembly, easy to maintain and to operate.
- Volumes and pressure can easily be set on the front panel.
- Dimensions outside (max.): 1400mm high x 560mm wide x 410mm deep.
- Automatic venturi for suction during opening is standard.
- Optionally available with fully automatic after-clean rinsing.

See overview on page 167

AGC 40
140 cm x 56 cm x 41 cm

AGC 40 AUTOMATIC GUN CLEANER WITH FULLY AUTOMATIC RINSING

Same as automatic gun cleaner AGC 21 +

- External air blow gun AGC25
- Galvanized bin cover AGC26
- Fully automatic rinsing system AGC35

50 cm x 50 cm

WAP 10 SOUND DEADENING PADS

- Self-adhesive sound deadening pads - to prevent sound vibration.
- Bitumen based with protection layer, very flexible, easy to cut and heat resistant.
- Each pad can be torn in half due to a perforated line in the middle to make two pads of 25cm x 50cm.

50 cm x 50 cm

WAP 15 ISOLATION PADS

- Specific flat surface
- Self-adhesive sound deadening pads - to prevent sound vibration.
- Bitumen based with protection layer, very flexible, easy to cut and heat resistant.

60 cm x 40 cm

PLA 80 DOOR FOAM FILM

- Foam film with adhesive for finishing and isolating inside doors as original.
- Raster printed protection film for easy cutting into shape.

Panel accessories

EQU 40 THINNER SIPHON

Thinner siphon is the solution for dispensing solvents without having to manipulate heavy cans. Suited for plastic or metal cans with up to 30l content.

EQU 401 SIPHON PIPE + TAP FOR EQU 40

BID 00 TAP FOR BARRELS 20/25/30L

EQU 91 PANEL FIXATION SET

- Set of 5 interchangeable bars that can be used to fixate panels in a firm 'open' position to work on them. For use on doors, bonnet and boot lid.
- Each bar has a hook and an eye for attachment on to a lock.

TRT 27 TRIM REMOVAL TOOL SET

With this complete set of plastic tools, interior panel removing without damaging the panel becomes an easy job, good overview without losing any item thanks to the handy toolkit case.

PRD 55-05-10-11

ADHESIVE ERASER AND ACCESSORIES

- Rotation disc made of natural rubber available in different models and dimensions.
- To be used on a power drill to remove adhesives, stickers or double sided tape without harming the surface underneath.
- Recommended rotation speed between 2,000 and 4,000 rpm.
- PRD 05: ridged disc; can be fitted directly on the PRD 55 machine.
- PRD 01: can be used on every drilling machine.
- Advantage of PRD 05 over PRD 01: the disc is much wider and is ridged. Due to the ridge the paint does not become warm, there is no paint damage and works three times faster than the PRD 01.
- The combination of PRD 05 with PRD 55 also results in a better finish and is much more user friendly than PRD 01 on a drilling machine.
- To remove paint and corrosion very fast with a minimum of metal degradation using the metal brush and its adaptor on the Finixa PRD 55; patented quick change technology from the brush on its adaptor, no tools required.

FLUO MARKERS

- Handy to mark smaller damages on the hull.
- Easily removed by any type of degreaser.
- Available in 4 fluorescent colours: green, pink, yellow and blue.
- Two sizes: round diameter 4mm / rectangular 15 x 7mm.
- MAR1xx (round point) draws a line of 1.5 mm wide
- MAR2xx (rectangular point) draws a line of 1.5 mm on the point; 5mm on the small side and 15 mm on the large side

TIP:

- Not to be used on freshly painted panels as you can create scratches.
- Solvents can react with the MAR liquid.

SUP 00

STEP-UP

- Strong, safe and lightweight: can be used to stand on to reach higher spots and as a seat for comfort during daily activities.
- Strong and durable: handles up to 175kg
- Made of polypropylene and therefore lightweight: weighs only 3,4kg
- No sharp corners; no risk of damaging cars
- Opening in sides as a handle for easy carrying
- Rubber anti slip feet
- Anti slip steps

CIL 00

COLOUR INSPECTION LAMP

- This colour match light is designed for repair, detailing, paint correction and paint booths.
- Highest colour match rating of any LED light on the market
- Spots colour differences and paint imperfections like only a high colour match light can

PROMOTIONAL ITEMS

PROMOTIONAL ITEMS

Finixa offers a wide range of branded promotional items to its dealers. Some have become our 'traditional' items, such as T-shirts, notebooks, cups, etc. A selection can be found on this page.

Some of our new items include the folding box, a new model of remote control car, a keychain made of recycled ocean plastic, a nice wind & rain jacket, a Finixa banner or beach flag, etc. We plan to have other promotional items available on a more frequent basis and in a limited edition.

Take a look at the latest promotional items online!

WWW.FINIXA.COM

#TEAMTURTLE

[Sea Turtle Conservation Curacao](#) is a program that involves research, conservation and education and aims to protect sea turtles, an endangered species. They want to raise awareness about sea turtles and the threats they face as a result of the large amounts of plastic in the ocean.

Sea Turtle Conservation and an organization called Limpi Recycling in Curacao have teamed up by using art made from recycled ocean plastic as a means to get the message across. This art is offered for sale in order to raise money to help protect sea turtles.

We are very happy to contribute to this amazing program by purchasing customized Finixa keychains made out of plastic found in the ocean. By doing so, we wish to support the conservation of sea turtles.
