paint processing products

# PRODUCT CATALOGUE

## NEW PRODUCTS

We are very proud to present to you the Finixa catalogue, further diversifying our high-quality product range for the professional car body shop. Finixa as your one-stop-shop for collision repair solutions.

## USER FRIENDLY

Our products are divided into 12 chapters. Each chapter starts with a technical page on which you can find product comparisons and application examples (grey pages). An alphabetical article listing is included in the last section of the catalogue. This ABC-listing will help you locate articles within the catalogue.

## APPLICATION OVERVIEWS

At the start of each chapter technical overviews are given on a grey page (technical features, product applications, etc.). Look for this icon throughout the catalogue!

**NEW**

## NEW PRODUCTS

Each new product can be easily recognized throughout the catalogue.

## VIDEO LINKS

Buttons link to an application video on FinixaTV.

## ALPHABETICAL LISTING OF ARTICLE NUMBERS

To help you locate articles within the catalogue. Contains the quantity per sales unit, per box and per pallet. New products are also indicated in the list.

## USE OF ICONS

We use icons to help us classify products; for example to indicate water-based or UV-products.

This catalog provides an overview of products in the state of publication date. Due to our continuous product improvement, products and/or packaging may change without notice. The pages of this catalog may contain technical errors, outdated information or typographical errors.

# FINIXA, MADE BY CHEMICAR

---

*Chemicar Europe NV designs and develops high-quality, non-paint products (consumables and equipment) for the professional body shop, under the quality brand Finixa.*

## HIGH QUALITY

Our products are tested extensively before they are brought onto the market.

---

## INNOVATION

Our research and development department focuses on product innovation and improvement in order to not only meet the demands of the market, but to simplify the car repair process.

---

## SUSTAINABILITY

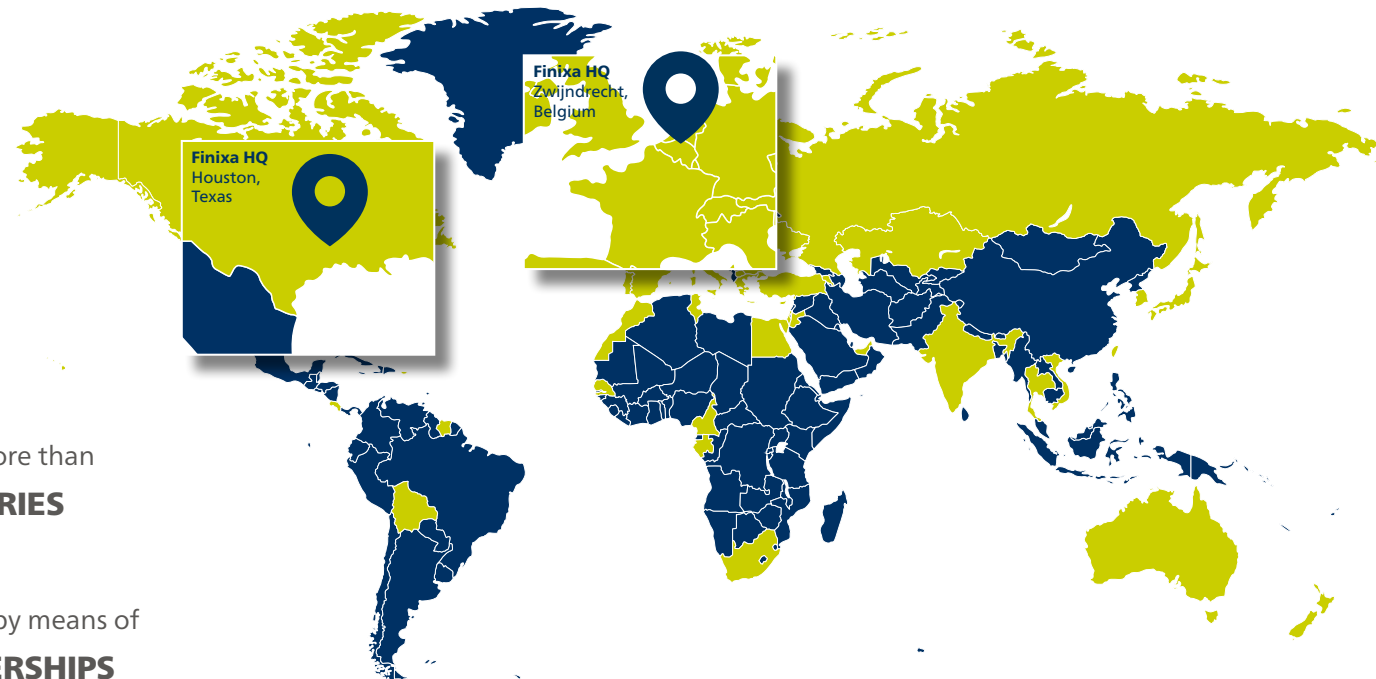

We work on finding solutions to replace traditional solvent-based products by high-performing water-based alternatives.

---

# DISTRIBUTION

---

Chemcar operates via a network of dealers all over the world. Body shops buy their Finixa products via one of our dealers. We have distributors on an exclusive and non-exclusive base in almost 100 countries.

Distribution in more than  
**100 COUNTRIES**

---

Expand brand reach by means of  
**LOYAL PARTNERSHIPS**

 Finixa network of dealers

# TRAINING CENTRE

*The brand new Finixa training centre is fully equipped with the latest technology for the automotive aftermarket, including a spray booth. As part of our support plan, we offer technical training, to be organised at our head quarters in Belgium. Here, our dealers, co-workers and interested body shops worldwide are trained in and informed about our technology in our 450 m<sup>2</sup> training centre.*

We organise courses and workshops as a forum to share know how and experience. Customers from all over the world visit our training centre to get demonstrations on how to use Finixa products. Of course, we also offer online demonstrations or

product training. This gives our dealers and body shops the means to ensure that they work with our products in a safe manner while guaranteeing that they end up with a perfect result.

# OUR AIM

---

## **TO MAKE REPAIRS MORE DURABLE**

By working on high-quality, high-performing products

---

## **TO SIMPLIFY THE CAR REPAIR PROCESS**

By updating working techniques, improving existing products and developing new products

---

## **TO SHARE KNOWLEDGE**

By organizing courses and interactive workshops to increase efficiency levels in the body shop

---

## **TO WORK ON A CLEANER ENVIRONMENT**

By replacing traditional, solvent-based products by high-performing, water-based alternatives

---

## RESEARCH & DEVELOPMENT

---

*As part of our growth plan, we work on new product development and product improvements. All products are tested extensively before they are brought onto the market.*

***We work on finding solutions to replace traditional solvent-based products by high-performing water-based alternatives.***

# PAINT PREPARATION & APPLICATION

*The topcoat remains the most visible step in the entire collision repair process. Colour matching, gloss level and surface structure determine to a large extent whether or not a repair has been carried out professionally. That is precisely why the way in which the paint products are prepared and applied is of great importance for achieving a high-quality end result. Finixa offers a complete range of products for both paint preparation and application. Transform your painting process with our Green Paint System. Achieve professional results in record time with our sustainable, patented product, designed to reduce waste and increase efficiency.*

## PRINTED MIXING CUPS

### MCP

- Optimized height-width dimensions for more accurate mixing
- Clearly printed and readable from the inside mixing ratios
- 10 different mixing ratios
- Available in 6 volumes: 400cc, 650cc, 900cc, 1300cc, 2240cc and 5000cc
- Bottom feet protecting against cold transfer during mixing
- Stacking supports for easy separation
- Winter proof plastic
- Lids available separately
- Also available in an untransparent black version, ideal to store UV sensitive paints like water based base coats or UV primers
- (only available 400 & 650 ml)
- Dispenser in stainless steel available separately

400 ml 650 ml 900 ml 1300 ml 2240 ml 5000 ml

## UNPRINTED MIXING CUPS

### MCU

- Especially developed for mixing with mixing ruler or scale
- Has the same properties as the printed mixing cups MCP
- Available in 5 volumes: 400cc, 650cc, 900cc, 1300cc and 2240cc

400 ml 650 ml 900 ml 1300 ml 2240 ml 5000 ml

### Reduce, reuse, recycle

*The renewed painting system uses an ultra-thin PET liner. Using recycled Polyethylene terephthalate (PET) puts us a green step ahead as a company. Even more so because we use an incredible 40-50% less plastic to produce our flexible inner cups compared to the average liner by our competitors on the market. Looking at a European market of a tremendous 150 million produced systems, this is a significant amount of saved plastic.*

**NEW**

## GREEN PAINT SYSTEM

GPS 650125 - 650190

- In house development : Belgian patented product
- Sustainable production : our goal is to reduce waste
- Ultra thin PET-liner : up to 50% thinner compared to traditional systems
- Highly transparent PET-liner for accurate mixing
- Easier and faster collapsing PET-liner than LDPE and therefore faster paint release out of the PET-liner
- Less friction resulting in a better paint flow
- Reusable outer cup with 10 different mixing ratios, optimized height-width dimensions for more accurate measuring
- Lightweight lid with integrated strainer
- Store leftover paint easily with the closing cap
- Packed in a handy dispenser box : use together with our wall mount (WMG 00) to conveniently attach the box to the wall in just a few seconds

650  
ml

 WATCH VIDEO

Did you know that PET ensures minimal friction with the paint, more chemical resistant than LDPE and collapses a lot faster than LDPE? In this way, the unique PET liner does not only leave less paint residue in the liner and reduces the weight of plastic waste but on top of that ensures you at all times in a perfect color match.

Want to know more about our recycling process?

SPG 100

## MINI SPRAY GUN

### SPG 100

- Ergonomic grip
- Minimal overspray, maximum transfer efficiency
- LVLV technology: over 74% effective transfer efficiency
- Lightweight anodized aluminium body
- Can be used for water-based and solvent-based paints
- Required air feed pressure: 1.5 bar
- Standard with a 0.8mm nozzle. Nozzles 0.8mm, 1.0mm, 1.1mm, 1.2mm also available separately
- Incl. cup 100 ml (also available as spare part SPG 100C)

CAN BE USED WITH:

### GRAVITY CUP 100ML

#### SPG 100C

SPG 500

## SPRAY GUN

### SPG 500

- Ergonomic grip.
- Minimal overspray, maximum transfer efficiency.
- LVLV technology: over 74% effective transfer efficiency.
- Lightweight anodized aluminium body, available separately: stainless steel needle set.
- Can be used for water-based and solvent-based paints.
- Required airfeed pressure: between 1.8 and 2.2 bar.
- Incl. cup 500 ml (also available as spare part SPG 500C).
- Nozzle set to be purchased separately (not included).

CAN BE USED WITH:

### GRAVITY CUP 500ML

#### SPG 500C

**10 L PRESSURE TANK****SPG 80**

1	Pressure tank	SPG 80	10L
2	Spray gun for SPG 80	SPG 81	nozzle 1.8mm
3	Set hoses for SPG 80	SPG 82	10m

**1 — 10 L PRESSURE TANK****SPG 80**

- The combination of the 10L tank and 10m air/paint tubes makes the SPG 80 the ultimate tool to protect your spray booth by applying spray booth protect.
- Includes a set of hoses (black and transparent) and a spray gun with a 1.8mm set.
- Place SPG 80 in the centre of the spray booth, no need to move as the 10m hose will allow you to go around the complete spray booth without having to move the tank.
- Combination of an aluminium spray gun and a galvanized powder coated tank allows you to apply in a very comfortable way any primer, basecoat or topcoat, water or solvent based coatings.
- Available as spare parts: SPG 83 transparent hose, SPG 82 set of hoses, SPG 81 spray gun for pressure tank

**2 — SPRAY GUN FOR SPG 80 WITH 1.8MM NOZZLE****SPG 81**

- Spray gun for SPG 80
- Nozzle of 1.8mm

**3 — SET HOSES FOR SPG 80****SPG 82**

- Set of hoses for SPG 80
- 10mm inner diameter for more product flow
- 10M length

**4 steps to operate the pressure tank**

*(some pressure loss can occur when using a 10m hose):*

1. Pour the product to be sprayed in the tank and set up for use.
2. Close the air inlet regulator on the spray gun completely.
3. Open the trigger of the spray gun and adjust the tank pressure till a smooth +/-15cm radius product flow is produced.
4. Adjust the air inlet regulator of the spray gun till the desired spray pattern is obtained.

## HIGH TRANSFER SPRAY GUN - BASE/CLEAR

### SPG 800-900

- Premium spray gun, developed in-house, complies with all VOC regulations
- The gun is available in 2 versions, a matt version (SPG 800 for basecoats) and a glossy version (SPG 900 for clearcoats)
- Standard the gun is equipped with a 1.3 nozzle kit, optionally available 1.2, 1.4, 1.5 and 1.8mm nozzle sets (SPG 900K)
- These spray guns with LVLV technology produce the finest atomisation at 1.1-1.4 bar output spray pressure and give high paint transfer with very little overspray
- These spray guns not only perform exceptionally but are also built to last
- Lightweight aluminium housing
- 100% steel liquid passages (stainless)
- No rubber parts
- Ergonomic grip
- Easy to adjust
- Fast and smooth application
- Supplied in a hard case, including paint cup (600ml) and maintenance tool
- Handy pressure regulator (SPG 920) and maintenance kit (SPG 910) available separately
- Inlet pressure between 1.8 and 2.2 bar, outlet pressure between 1.1 and 1.4 bar
- Can be combined with Green Paint System (GPS) and adapter (GPS 01)

CAN BE USED WITH:

### GRAVITY CUP 600ML FOR SPG 800-900

SPG 700

## MINI SPRAY GUN PRO

### SPG 700

- LVLP technology: over 74% effective transfer efficiency
- Specifically developed for spot repair
- Lightweight anodized aluminum body, ergonomic grip
- 100% stainless steel fluid passages, no rubber parts in the design
- Fine atomization, adjustable spray pattern
- Required air feed pressure: 1.5 bar.
- Standard with a 0.8mm needle.
- Needles 0.8mm, 1.0mm, 1.2mm also available separately.  
Incl.cup 100 ml

NVZ 0190

NVZ 0125

## PAINT STRAINER

### NVZ 0125-0190

The new versions of our paint strainers have a better adhesion, so that the resistance to solvent-based paints is higher, as well as certain industrial paints.

190µm RED - NVZ 0190

125µm BLUE - NVZ 0125

New bonding excellent resistance to solvent-based paints

Packaging: 4x 250 pieces (in handy dispenser boxes!)

Perfect nylon filter mesh

Precise filtering

20cm

## MIXING PADDLES PLASTIC

### MPP 0250-02501

- The S-shape of the MPP has the advantage that it mixes paint faster and preciser than conventional methods
- 20cm S-shape paddle
- Black colour will allow to do a pre-colour check while mixing

#### SALES UNITS:

- MPP 0250: Dispenser box containing 250 mixing paddles
- MPP 02501: 8 refill bags containing 250 mixing paddles each - for dispenser bucket

30cm

## MIXING PADDLES PLASTIC

### MPP 0200

- The S-shape of the MPP has the advantage that it mixes paint faster and preciser than conventional methods
- 30cm S-shape paddle with a solid hand grip
- Black colour will allow to do a pre-colour check while mixing

#### SALES UNIT:

- MPP 0200: Dispenser box containing 200 mixing paddles

23cm

## MIXING PADDLES

### GAC 0250-1000

- The straight shape of the mixing paddle makes it easy to scrape it off at the edge of a mixing cup.
- Length: 23 cm.

#### SALES UNITS:

- GAC 0250: Box containing 250 mixing paddles
- GAC 1000: Box containing 1000 mixing paddles

DDD 00

### 3D SPRAY SAMPLE

#### DDD 00

- For test spraying 'special effects' colours
- The complex shape of the spray sample allows the operator to check paints in all angles
- Dimensions: L230mm x W130mm x H45mm

100p.

SSP 00

SSP 01

SSP 02

### SPRAY SAMPLE PLATES

#### SSP 00-01-02

- Metal plates for colour sampling
- Colours: pre-treated with white, light or dark grey primer
- Black line over the complete length to check colour covering after spraying
- Dimensions: 105mm x 150mm

SSP 40

SSP 42

SSP 50

ILO 20

## FILING SYSTEM FOR SAMPLE PLATES

### SSP 40

- Filing system for 250 SSP sample plates with or without envelope.
- System carries one plastic filing box with 6 adjustable dividers, 88 blank labels and a marker to make notes on the back of the plates.

## ENVELOPES FOR SPRAY SAMPLE PLATES

### SSP 42

## MAGNET HOLDER AND STAND FOR SAMPLE PLATES

### SSP 50

- Magnet holder (fork) and magnet stand for hands-free handling of the SSP spray samples.

## DRYING OVEN FOR SPRAY SAMPLE PLATES

### ILO 20

- Drying oven for spray samples
- Easy to use
- Can be used with water and solvent-based paints
- Just connect to the power supply

 WATCH VIDEO

EQU 85

PIP 03

SIP 1000

## SPRAY GUN SUPPORT WITH MAGNET BACKING

### EQU 85

- Very strong magnet; holds 2 filled spray guns
- Can easily be replaced
- Keeps your airlines clean and off the floor

## SIPHON

### SIP 1000

- 1L bottle with siphon to accurately add liquid to a mixture like distilled water into water-based base coats.

## PIPETTE

### PIP 03

- Precisely remove any excessive pigment from a mixture.
- Can also be used to precisely add liquid to mixture.

## DISPENSER FOR MIXING CUPS & LIDS

### MCD 70

#### CUP DISPENSER

- Holds 6 mixing cups: 2x 400ml, 2x 650ml, 1x 900ml and 1x 1300ml
- Stainless steel
- Easy to attach to wall (2 screws)

#### LID DISPENSER

- Holds the lids for the corresponding cups
- Stainless steel
- Easy to attach to wall (2 screws)

GAD

## BLACK PLASTIC (PE) STORAGE CUPS

### GAD 00500-10000

- Black cups are not transparent and ideal to store and transport “UV sensitive” coatings like UV primer/fillers or water-based basecoats.
- Each cup is supplied with an airtight sealing lid and suitable for transportation of ready mixed colours.
- Suitable and tested for road transport of water-based paints.
- Fit to store water-based paints for months.

## DEGREASING CLOTHS IN DISPENSER BUCKET

### SOF 25

- In need of more control while degreasing, pressure sprayers often create overspray on already paper masked surfaces or non-treated tapes. SOF 25 is a ready-to-use degreaser. Just add 750ml of water-based degreaser to the bucket and it is ready to use. Every cloth removed from the bucket will be pre-treated with degreaser for extra control.
- Available in dispenser bucket (70 cloths)
- Size cloth: 450mm x 300mm

## DEGREASING CLOTHS - TURQUOISE

### SOF 20 - 21

- Degreasing cloths with excellent absorption capacities
- Suited for water-based and solvent-based degreasers
- Lint- and silicone-free
- Available in dispenserbox per 200 pieces (SOF 20)
- Available perforated on a roll per 500 pieces (SOF 21)

## DEGREASING CLOTHS - WHITE

### SOF 19

- Degreasing cloths with excellent absorption capacities.
- Suited for water-based and solvent-based degreasers.
- Lint- and silicone-free.
- Available in dispenser box per 260 pieces
- 330mm x 420mm

## REFILL PACK FOR SOF 25

### SOF 251

- Set of 6 rolls degreasing cloths for the SOF 25 degreasing system
- 70 cloths per roll, 45cm x 30cm

SOF 50  
380 x 400 mm

SOF 52

SOF 11  
380 x 400 mm

### CLEANING/DEGREASING CLOTHS

#### SOF 50-52

- Universal degreasing cloth with a large absorption capacity.
- Voluminous and soft; comfortable handling
- Suited for all kinds of applications such as degreasing and cleaning with solvent-based products or oil.
- Available in dispenser box per 225 pieces (SOF 50)  
- 380mm x 400mm
- Available perforated on a roll per 500 pieces (SOF 52)  
- 380mm x 320mm

### CLEANING PAPER - 3 LAYERS

#### SOF 60

- Cleaning paper with 3 layers for all kinds of maintenance.

### CLEANING PAPER - 2 LAYERS

#### SOF 62

- Cleaning paper white - 2 layers - for all kinds of maintenance.

### POLISHING CLOTHS

#### SOF 11

- Single-use cloths
- Multifunctional use
- Very soft & substantial, so no risk of scratches
- Excellent absorption of polishing compound
- 100% Silicone-free: Can also be used in the preparation area
- Can also be used for interior cleaning

**TACK RAGS STANDARD / TACK RAGS STANDARD WATER-BASED**

**TAK 00-01**

- Unique impregnation: never dries out - silicone-free.
- Before use unfold completely and then make a ball; use this ball to rub the surface gently, by doing so the rag will wipe away all dust.
- Attention: do not put pressure on the rag during use, as you might only move the dust instead of wiping it away.

**EXTRA ADVANTAGE TAK 01:**

- Impregnated with a water-based product: works anti-static, unlike other tack rags.
- Never leaves traces of glue that could possibly cause a reaction with any paint.

CAN BE USED WITH:	 SOLVENT BASED	 WATER BASED
	<b>TAK 00</b>	●
<b>TAK 01</b>	●	●

**TACK RAGS CTI / TACK RAGS CTI WATER-BASED**

**TAK 10-11**

- Tack rag with a wavy surface structure: once removed from the packaging, instantly ready for use.
- Ideal for large surfaces.
- Attention: do not put pressure on the rag during use, as you might only move the dust in stead of wiping it away.

**EXTRA ADVANTAGE TAK 11:**

- Impregnated with a water-based product: works anti-static, unlike other tack rags.
- Never leaves traces of glue that could possibly cause a reaction with any paint.

CAN BE USED WITH:	 SOLVENT BASED	 WATER BASED

**SILICONE REMOVER****DGR 05-25**

- The versatility of our water-based degreaser is remarkable as it effectively eliminates dirt, dust, swarf, and grease from various surfaces including old paint layers, primers, metal (steel, aluminium and galvanized pieces) and plastic.
- It serves as an excellent substitute not just for other water-based degreasers, but also for solvent-based silicone removers. Moreover, our product offers exceptional performance, serving not only as the ultimate step in degreasing for water-based lacquers.
- To remove residues of tar or glue we recommend to use our cleaner with scuff rolls (SBR 10-20-30).

**WATCH VIDEO**

Why you should use a water-based degreaser instead of a solvent-based degreaser:

**\*Eliminates salt and soap rests.**

*By using 2 cloths, the water-based degreaser removes all dirt from the surface without leaving any traces.*

**\*Can be used without mask or gloves.**

*Next to being nature friendly, the water-based degreaser can be used without any protective gear.*

**\*Antistatic action on the surface**

*Compared to solvent-based degreasers, the water-based degreaser completely nullifies any static action on the surface.*

**\*Does not affect rubber or plastic**

*The water-based degreaser does not affect rubber or plastic, while solvent-based degreasers almost always cause damage to the surface.*

TSP 600

## FOAM IT!

### TSP 600

Foam it! is an ammonia-free universal water-based cleaner and degreaser in an aerosol. In contradiction to what is on the market already, Foam it! is not only ammonia-free but leaves, once sprayed, a thin foam layer on the surface. This foam releases all kinds of dirt and grease almost instantly from any surface and wipes off very easily, without leaving any traces. Can be used as a general purpose automotive or domestic cleaner, but is also useful to prepare a surface before painting or plastic repair considering its unique degreasing formula.

Application: spray Foam it! and wipe off with a soft microfiber or non-woven cloth.

## WATCH VIDEO

### THE APPLICATIONS ARE ENDLESS:

- Car exteriors  
(dry cleaning of painted parts, carwash without water)
- Car interiors  
(plastic, leather, wood, metal, glass, dashboards, door panels, LCD screens)
- Kitchen and bathroom cleaner  
(anti-bacterial quality)
- Window cleaner, mirror cleaner, TV cleaner
- Rim cleaner

SOF 91

### WALL MOUNT ROLL DISPENSER

## CODING CAPS

### LSP 50

- Tired of searching for the correct and/or misplaced pressure sprayer? Use the set of 5 coloured magnetic holders and coding caps to organise your workshop! The caps are placed over the sprayers' nozzle so there is never a risk of contamination while refilling. The holders can be fixed to metal using the strong magnet or fixed to any surface using 2 screws.

## PRESSURE SPRAYER 1L RESISTANCE LIST

### LSP 20 LSP 202

- Pressure sprayer for spraying water- and solvent-based degreasers.
- Resistant to solvents due to viton parts, always consult resistance list before use.

## RUBBER JET

### RJE 20-21

- The rubber tip makes it easy to blow out dirt and dust from cracks and joints without the risk of damaging paintwork.
- The airflow can be regulated by loosening or tightening the screw on the RJE.
- 2 versions available: RJE 20 to be used with a customer provided airline coupling or RJE 21 which has a CJEN coupling pre-installed.

## WINDJET

### WJE 05

- Windjet air nozzles deliver a high performance flat jet of compressed air.
- The nozzle (made of ABS plastic) is designed for cooling, drying and cleaning by hand or in a fixed setup.
- Ideal for drying water-based paint jobs on spot repairs.

## BLACK TYRE GEL

### BTG 05

- Black tyre gel makes tyres deep black and leaves them shining for a very long time. Also suitable to refurbish non-painted plastic parts. Water-based and silicone free.
- Can be applied with the black tyre gel applicator sponge (BTS 12).

WATCH VIDEO

## PLASTIC RENEWAL GEL

### PRG 05

- Plastic renewal gel nourishes plastic, leather interiors
- Re-intensifying the colour leaving natural gloss.
- Easy application with hand foam pad POL 33
- Water-based and silicone-free.

## BLACK FOAM PAD 'SOFT'

### POL 33

- Soft open foampad with handgrip
- For manual polishing or applying plastic renewal gel

## BLACK TYRE GEL APPLICATOR SPONGES

### BTS 12

- Applicator sponge to apply black tyre gel or plastic renewal gel
- Saves time and product
- Crescent shaped for fast and clean application on tyres
- Soft foam also suitable for interior applications
- Good grip through hard foam handle
- 1 sales unit contains 12pcs

## MACHINE AND HAND WAX

### MHW 05

- Protect your paint or polished work for a long time; use the Finixa hand and machine wax by hand or machine.
- High-grade natural and synthetic wax components.
- Deep gloss result
- Durable paint protection
- Grapefruit smell.
- By hand: rub in with POL 33, wait a few minutes and polish the excessive dry product away with a clean microfiber
- By machine: apply at medium speed, use a soft pad and apply the product onto the panel. Wipe away with a microfiber cloth.
- Water-based product

## CLAY PAD WITH VELCRO 15 CM

### CLP 15

- For fast and effortless removal of overspray, resin, insect remains, old wax, etc.
- 15 cm diameter
- Makes claying fast and easy
- Use in combination with Cleaning clay lubricant (CCL 10)
- For use on orbital sanding machines at moderate speed
- Optional velcro adapter (CLP 16) for hand use

## VELCRO HAND PAD 15CM

### CLP 16

- Adapter for manual use of clay pad CLP 15

**NEW**

CCB 00  
200g.

## CLEANING CLAY BAR

### CCB 00

- Quickly and easily removes bonded surface contaminants like overspray, bug debris, road tar, rail dust and fresh water spots
- Restores a smooth, glossy finish
- Prepares the paint for polishing or waxing
- Non-abrasive and safe on clear-coat and single-stage paints, glass, metal and plastic
- For optimal results use with clean clay lubricant (CCL 10)

## CLEANING CLAY LUBRICANT

### CCL 10

Specially designed to provide the vehicle with a lubricant during the claying process. This will allow you to remove adhered contaminants from the surface very easily and efficiently. With the help of this lubricant, the chance of scratches is significantly reduced and the surface feels smooth. After claying, the surface is ready to be polished or waxed.

## LARGE MICROFIBER CLOTH

### TWL 00

- TWL 00 is a large double-sided long-haired microfiber cloth with which it is possible to dry a complete car in one go, without wringing out the cloth. Microfiber is a high-quality textile composed of polyester and polyamide.
- Microfiber cloths can be used both dry and wet. In a dry state they attract dust and dirt as a powerful magnet.
- When wet, they can absorb more than 7 times their weight. Dimensions 60cm x 90cm. Packed individually.

## SPONGES

### SPM-SPJ 00

- Jumbo sponge to clean car, motorcycles, vans, ...
- Highly water-absorbent
- Microfiber skin will remove aggressive dirt, like insect marks on headlights and bumpers, faster without leaving scratches.

## BUCKET WITH SPOUT - 12L

### BUC 12

- 12 Litre bucket with pour spout, available with optional 'anti-dirt' screen keeping larger dirt at the bottom and avoiding the transfer of these sharp components to your vehicles surface.

## ANTI-DIRT GRID FOR BUC 12

### BUI 12

## WATER BLADE

### WWB 00

- Soft silicone blade for removing water fast and easy after washing down a vehicle without harming the lacquer.
- Works very fast.
- Makes no scratches.
- Flexible silicone blade moulds to the shape of any surface.
- Virtually eliminates messy towels and chamois.
- Reduces streaking by 80%.
- Suitable for all surfaces.
- Width: 33cm.

## HEADLIGHT RENEWAL SET

HRS 00

- Brings headlights back to their original state in just a few easy steps!
- Avoid costly replacements
- Removes UV radiation, stone chips and yellowing
- Increases light output and car value
- Easy and cost effective: simply sand, degrease and spray

### EASY ALL-IN-ONE SET INCLUDING:

- Waterproof abrasive SPLA 0800 and 1000
- Ammonia-free water-based cleaner and degreaser TSP 600
- FOAM-IT: aerosol 500 ml
- 2K clear coat with perfect adhesion on polycarbonate, scratch free, petrol and UV-resistant, fast drying: TSP 710 aerosol 250 ml
- 1 microfiber cloth

## 1-STEP POLISH PASTE

### POL 05-10

- Based on nanotechnology, this paste can polish not only very fast from coarse to very fine, but it also brings back a gloss degree of 95%. An additional advantage is that this paste stays "wet" for a long time and it minimizes the risk for dry powder residue. This polish paste can be used on old paints and fresh paints, also on all 2K products and the newest generation of ceramic paints.
- Can be used for different applications: removing dust, polishing spray zones, polishing contamination after sanding, bringing back gloss on old, mat paints, refurbishing headlights.

#### ADVANTAGES:

- 1 product from start to finish
- Water-based
- For used on fresh and weathered paints
- Up to 50% time saving
- No need for masks or gloves Easy clean-up, even on black plastic parts
- Very high cutting power
- Low dust formation
- Outstanding gloss

## ELECTRIC POLISHER

### POL 55

- 1050W
- 2:1 transmission - high torque at low RPM
- Improved cooling-ventilation system
- Adjustable from 700 up to 2500 RPM
- Very lightweight (2,6 kg): easy and comfortable handling
- 5m cable
- Including backing pad, side handle and spare carbon brushes

POL 56 (M14)  
Ø 120 mm

POL 81 (M14)  
Ø 180 mm

POL 80

### BACKING PLATE - 120MM

#### POL 56 / POL 57

- Universal, fits on almost all electric polishing machines. This polishing pad is unique because of its flexibility: when polishing flat, you use the entire surface of the polishing pad just like other polishing pads (diameter 145mm). But with this pad you can also easily polish over edges and even polish at an angle which makes it possible to put locally and temporarily more pressure on the surface while the polishing pad itself stays flat.
- Can be used with the following pads: POP 114-314-514-714-914

### BACKING PLATE FOR POL 50-55-80 - 80MM

#### POL 58

- Universal backing pad; fits almost all electric polishing machines (POL 50, 55 & 80)
- diameter 75mm - M14
- Medium flexibility
- Ideal for spot repair
- For use with 80 mm polishing pads POP 108-308-508-708-908

### BACKING PLATE FOR POL 80 - 180MM

#### POL 81

- Interface pad for POL 80 - 180mm - M14
- Included when polisher is purchased.
- Can be used with the following pads : POP 117-318-518-718-918

## ELECTRIC POLISHING KIT

### DUST REMOVAL FILE

#### DRF 05-10

- A dust file made of very hard metal for removal of dust and dirt from dried paint.
- Simply lay the file flat down on the surface and gently cut the contamination out of the paint with a minimum of damage.

### DUST REMOVAL FILE APPLICATOR

#### DRF 50

- Applicator to be used in combination with DRF10.
- The magnet inside the applicator makes sure the file stays fixed during application.
- The applicator can also be used in combination with the SPDM sanding flowers. Stick the SPDM to the flat side of the applicator and you are ready to go.

### TOUCH-UP TIPS

#### PMP 20-21-22

- 100 touch-up tips packed in a convenient and dust-free dispenser.
- Ideal for touching up small paint damage and stone chips.
- The plastic shaft with plush-free tip is disposable, convenient and cheaper than a classic brush. Always a clean tip at hand!
- Can also be used as a pencil. By changing the pressure, you receive a bigger or smaller print. Ideal for making small lines.
- Thickness of the applicator = 3,28mm

#### AVAILABLE IN 3 THICKNESSES:

blue (regular) PMP 20 = 2,0mm  
 yellow (fine) PMP 21 = 1,5mm  
 white (very fine) PMP 22 = 1,0mm

### CLEANING NEEDLE SET

#### CNS 00

- A set contains one penholder with 10 replacement needles, individually packed in a blister.
- The needles have microscopic small hooks which make it possible to remove dust and dirt from wet paint.
- Made out of aluminum.

### REPLACEMENT NEEDLES IN A BLISTER 10P

#### CNS 01

SCU 20

### STONE CHIP REPAIR UV

#### SCU 20

- Fast UV curing clear coat for stone chip and scratch repair
- Fast, simple and cost effective repair of stone chips and scratches
- 1-component, fast curing
- No shrinkage after curing
- High level of finish
- Same strength, durability and chemical resistance as a 2K clear coat
- Can be sanded and polished after 45 seconds
- Curing with stone chip curing lamp SCL 00

#### THE PERFECT STONE CHIP REPAIR IN 10 EASY STEPS :

1. Clean/degrease the surface with TSP 600 Foam-it!
2. Sand around the stone chip with SPDM P1500-2000
3. Clean with TSP 600 Foam-it!
4. Apply the base coat
5. Dry the base coat
6. Apply stone chip repair UV with PMP touch-up tips
7. Dry for 45 seconds at 20mm. distance with stone chip curing lamp
8. Remove excess clear coat with DRF 10 dust removal file
9. Sand with SPDR P1500-2000
10. Polish with Finixa polishing system

 WATCH VIDEO

SCL 00

### STONE CHIP CURING LAMP

#### SCL 00

- Universal, handheld LED lamp for UV drying
- 3.7 V. lithium, rechargeable battery
- Recommended distance to surface: 10 – 30 mm.
- High power – 5 W.
- Can also be used as a detection and inspection lamp

**POLYESTER PUTTIES**

# 04

---

# POLYESTER PUTTIES

*For over 20 years now, Chemicar has been producing polyester putties. The first one being the black universal putty often copied, but never matched. By continuously developing new types of putties and by improving existing formulas we have become one of the leading putty manufacturers. Finixa putties are mainly used for car repair and are very much appreciated in body shops all over the world. Given the influence of the ever increasing labour costs on the total repair price, all our putties meet a high quality standard.*

## BLACK POLYESTER PUTTY GAPOL

### GAP 00

- Black universal polyester putty
- Similar to "MULTI" putty but black colour
- Universal adhesion on old painted surfaces, steel, light metals, galvanized steel, aluminium, wood and MDF
- Perfect to finish plastic repairs
- Visual aid during application (black shining filler); makes it easy to see all irregularities & imperfections
- Built-in sanding guide: during sanding the putty fades from black to dark grey
- The spots that are too low (not sanded) clearly remain black
- Once degreased, the filler regains its deep black colour; inspecting for possible irregularities is easy now.
- Built-in coating guide: whether one finishes with beige or grey filler, once the black colour is covered, one can also be sure of the necessary thickness of the filler coating.
- Built-in sanding through guide: if afterwards one would sand through the putty accidentally, the black base will occur as a sanding-through guide.

## POLYESTER PUTTY MULTI

### GAP 10

- Universal 2K polyester putty
- Maximum stability on vertical surfaces
- High filling power
- Fine grain composition
- No cracking on the edges by fine sanding
- Can be finished afterwards with FINE putty or directly with primer or filler.
- Less suited for light metals and galvanized bases.

## POLYESTER PUTTY FINE

### GAP 20

- Fine finishing putty. To be used after "MULTI" putty to remove small irregularities.
- To be applied in thin and very thin coats
- Bright white pigmentation
- High filling power
- A real 'finishing' putty
- Easy to apply and sand
- High elasticity
- To fill pin holes, small irregularities, small paint damages or scratches
- No sinking of the top coat

 WATCH VIDEO

**NEW**

**1kg**  
+ hardener

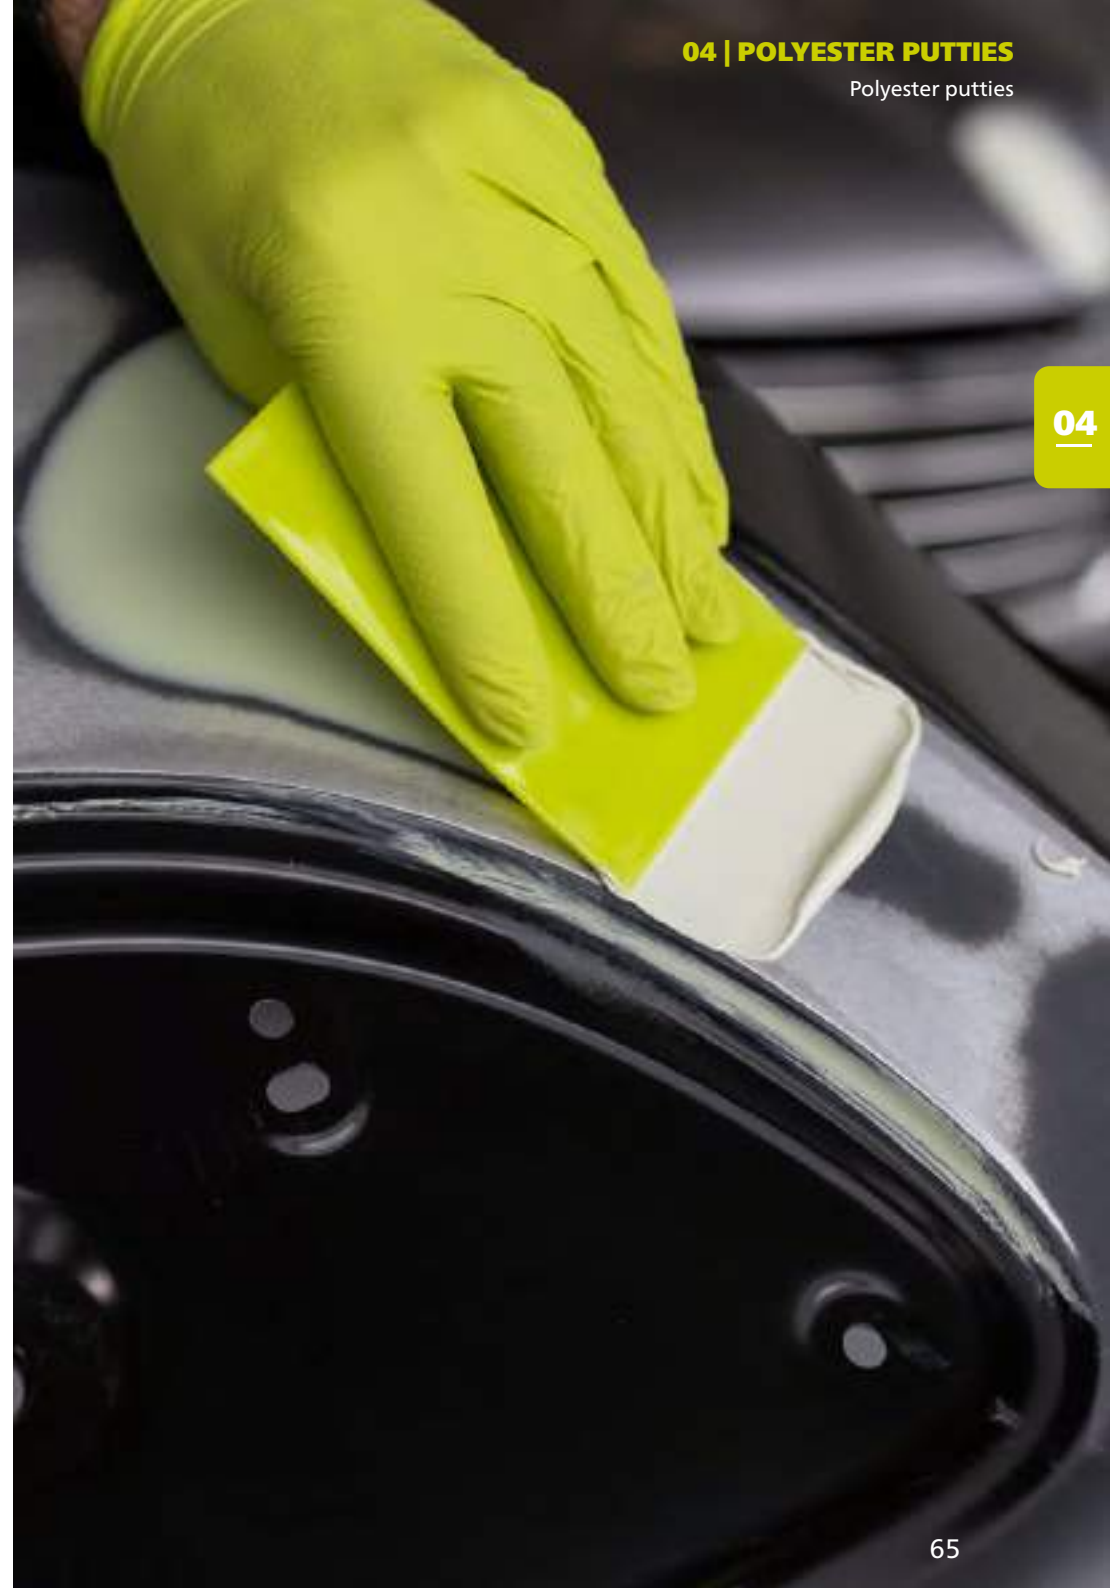

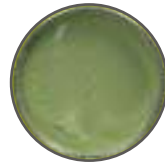

Light green

## SELF-LEVELLING PUTTY

### GAP 25

- Ultra smooth finishing putty
- Pinhole free self levelling ability
- To finish off any other polyester for final scratch removal or pinholes
- Easy to sand
- Alternative for GAP 20

 WATCH VIDEO

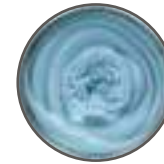

Light green

**1,5kg**  
+ hardener

### POLYESTER PUTTY LIGHT

#### GAP 30

- Universal light putty
- Extreme adhesion on metal surfaces
- High stability in the tin
- With glass balls as filling material
- Low shrinkage ratio
- Vibration-resistant and more flexible on thin metal
- Same applications as "MULTI" putty, but results in the same fine finish as "FINE" putty
- Easy sanding
- Extreme adhesion to a variety of substrates such as steel, E-coat, galvanized steel, glass fibre reinforced plastics (GFK) and wood
- Short drying time
- Specific weight 1.38 kg/L

Azure blue

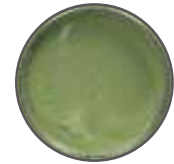

**1kg**  
+ hardener

### POLYESTER PUTTY ULTRA LIGHT - AZURE

#### GAP 31

- Universal, ultralight polyester putty
- Good adhesion to a variety of substrates such as steel, E-coat, galvanized steel, glass fiber, reinforced plastics (GFK) and wood
- Extra creamy for easy mixing & application
- Ultralight for easier and faster sanding & finer finishing
- Azure colour for easy coverage
- No pinholes
- Specific weight 1Kg/L

 WATCH VIDEO

Light green

**3kg**  
+ hardener

### POLYESTER PUTTY EXTRA LIGHT

#### GAP 33

- Universal extra light finishing putty
- Good adhesion on metal surfaces
- Low shrinkage ratio
- With pvc microbeads as filling material
- Same applications as "MULTI" putty but results in the same fine finish as "FINE" putty
- Combines excellent sanding properties, with an absolutely compact surface
- Easy sanding
- Good adhesion to a variety of substrates such as steel, E-coat, galvanized steel, glass fibre reinforced plastics (GFK) and wood
- Short drying time
- Specific weight 1 kg/L

Light grey

**1,8kg**  
+ hardener

Aluminium grey

**2kg**  
+ hardener

Steel grey

**1L**  
+ hardener

## POLYESTER PUTTY FIBER

### GAP 40

- Universal polyester putty with glass fibres to fill up larger surfaces and bigger irregularities
- Impregnated fibres for easy and equal spreading and finishing
- Perfect for polyester applications and repairs
- For bridging of cracks, small holes and rusted-through areas
- Waterproof; ideal for boat & marine repairs
- Good adhesion on glass fibre reinforced materials
- High stability

 WATCH VIDEO

## POLYESTER PUTTY ALU

### GAP 50

- Polyester putty refined with aluminum particles
- Perfect for use on body parts subject to mechanical stress
- Used to fill coarse irregularities, pores and holes
- Good adhesion on iron, steel, aluminum, galvanized substrates and glass fiber reinforced materials
- Good stability on vertical surfaces
- Can withstand temperatures of more than 90°C
- High elasticity
- Good sandability

## LEAD & TIN REPLACER

### DEB 12

- DEB 12 is a cold metal that can be used as an alternative to fluid tin
- Replaces Pb – Sn
- Exceptional hardness
- Flaky composition lends the product a very high degree of flexibility
- Once fully cured, it resists hydrocarbons (gasoline, diesel fuel) and some acids (battery acid)
- Reshaping of rough edges, wheel casings, doors and roof
- Perfect for repairing light alloy wheels
- The ultimate product for classic car restoration
- Heat resistant up to 180°C

**1kg**  
+ hardener

Black

## PLASTFILL - POLYESTER PUTTY FOR PLASTIC

### GAP 70

- Light putty specially designed for plastic surfaces
- Very high flexibility
- Smooth finishing
- Fast & easy sanding
- Can also be used on fiberglass
- Built-in sanding guide: during sanding the putty fades from dark grey to light grey
- Specific weight : 1,3Kg/L

Beige

## POLYESTER PUTTY – LIGHT AND EASY TO SAND

### GAP 90 - 93

- Easy to sand light polyester putty
- Very smooth finish
- Pinhole free due to self levelling ability
- Ideal for spot and smart repair
- No finishing putty needed afterwards
- Universal adhesion
- Much lower viscosity compared to GAP 30

 WATCH VIDEO

white

DEB 51  
30 g

### HARDENER WHITE

#### DEB 51

- White hardener for DEB 12
- Use 2 – 3%
- Always use GAP 60 during mixing to avoid air infiltration.

Blue

GAP 52  
50 g

### HARDENER BLUE

#### GAP 52

- Blue hardener
- Use 2 – 3%
- Longer open time as regular red hardener
- Same sanding time as regular red hardener

116mm x 78mm

## PLASTIC SPREADERS

### PPM 25

- Plastic disposable spreaders
- Dimensions: 116mm x 78mm
- 25 pcs.

50mm, 80mm, 100mm, 120mm

## METAL SPREADERS

### PPM 20

- Flexible metal spreaders
- One set is made up of 4 different widths: 50mm, 80mm, 100mm and 120mm

100mm x 70mm

## RUBBER SPREADERS

### PPM 40

- Flexible rubber spreaders with soft finish
- The unique shape allows the spreader to be used to reshape more complex contours
- 20 pcs.

245mm x 295mm

## MIXING BOARD

### GAP 60

- Multi-layered mixing palette board (100 sheets) for better mixed putty. It is better to use this board instead of mixing the putty with its hardener on the palettes themselves to prevent pin holes during application. Made of non-absorbing treated paper to avoid resin and hardener to be soaked up by the paper. Reduces cleaning: after use, simply tear off the used sheet and throw it away.

**BONDING, SEALING  
AND PLASTIC REPAIR**

# 05

---

## BONDING, SEALING AND PLASTIC REPAIR

*Increasingly more, traditional joining processes in the automotive industry are replaced by bonding technologies. The arrival of new synthetic materials and lighter metal alloys require new and adapted repair procedures. Finixa offers a wide range of adhesives and sealants especially developed for the professional body shop; versatility, problem-solving, time saving, ease of use and environmental friendliness are the parameters in the development of our products. Also take a look at our plastic repair technology. The ultra-fast and cost-effective curing times combined with an ease of use and extreme adhesion make this the absolute first choice of every professional.*

TSP 1100  
400 ml

## CONTACT GLUE

### TSP 1100

Extremely versatile, fast-drying spray adhesive that bonds to a wide range of materials

- Professional, industrial strength
- High initial strength
- High strength, fast, contact type adhesive
- Bonds laminate, wood, metal, plastic and more

MSA 100  
290 ml

## MS FAST ADHESIVE

### MSA 100

MSA 100 is a construction and assembly adhesive with a very high initial tack for the professional market, based on hybrid technology that forms a durable elastic rubber after curing. Can be applied on the bare plate without risk of corrosion. Shrink and air-bubble free. Absorbs sound and mechanical vibrations. Can be oversprayed with all common 1K or 2K paint systems on the market. Does not contain any isocyanates, phthalates, solvents or silicones.

- Durable, permanent elastic
- Universal bonding and sealing
- Adheres perfectly without primer on most even damp surfaces
- Free of isocyanates, solvents and silicones
- No shrinkage and bubble free
- Good UV resistance
- Neutral curing, almost odorless
- Non corrosive to metals
- High mechanical resistance strength
- Absorbs acoustical and mechanical vibrations
- Paintable with most common 1 and 2k paints

IAG 20  
20g

## INSTANT ADHESIVE GEL

### IAG 20

Instant adhesive gel provides a rapid bonding of a wide range of materials (metals and plastics and others). Can also be used to bond porous materials such as wood, paper, leather and fabric.

- Can be used on all surfaces
- Medium viscosity
- 1k-product
- Cures at normal room temperature
- Designed for OEM assembly

DZB 04-25

## DOUBLE SIDED TAPE RED

### DZB 04-25

- Acrylic adhesive base tape for attaching protective side moldings on vehicles.
- Strong initial contact; offers superior adhesion at any given temperature.
- In order to get a 100% adhesion, make sure the surface is properly degreased before application.
- The advantage of this unique acrylic tape is that the initial strength after 2 minutes is 80% of the total, whereas traditional double sided foam tape requires 12 to 24 hours to reach the same strength.

### AVAILABLE SIZES:

- 4mm, 6mm, 9mm, 12mm, 15mm, 19mm, 25mm

TAP 52  
18p.TAP 50  
18p.

## DUCT TAPE

### TAP 50-52

- Strong but tearable cloth based tape, ideal as a problem solver and very suitable for protecting the bodywork against sanding through paint on an adjacent area.
- Does not leave glue behind after removal.
- Can be handy for towing and transporting a damaged vehicle.
- Available in silver or black.
- High quality.

### AVAILABLE SIZES:

- 5cm x 50m (TAP 50)
- 5cm x 50m (TAP 52)

## SEAM SEALER ON A ROLL

### ESS 06-08-10

- OEM profile
- For plugging seams on doors, bonnets and boot lids
- Can be applied quickly and easily
- Heat resistant and can be overpainted immediately
- ESS 06: for Japanese, Korean and French cars
- ESS 08: most of the German cars (Mercedes, Volkswagen, Audi)
- ESS 10: BMW, vans and large SUVs

## ROLLER FOR EASY SEAM SEALER

### ESS 20

- Hand roller for applying seam sealer ESS
- Provides constant and even pressure
- Ensures better adhesion

## SPRAYABLE SEAM SEALER

### SSS 100-200-300-400

- MS Polymer
- Firm-setting sealer for interior and exterior auto body seams and joints.
- Replaces and repairs factory sealing jobs in trunk, floor and drip rail areas.
- No primer needed, good adhesion, lasting flexibility.
- Can be used as a sprayable sealant
- Has sound deadening properties
- Standard 290ml cartridge, fits in all standard caulking guns.
- Available in white, grey, black and beige colour.
- Paintable after 30 minutes with any water-based or solvent-based primer, basecoat or topcoat.

## PNEUMATIC COMBI SEALANT GUN

### CSG 00

Professional pneumatic application gun for one-component adhesives and sealants

- Processes both plastic and aluminium tubes (290 & 310 ml)
- For use with regular sealants & adhesives (MSA 100) and sprayable seam sealants (SSS 100-400)
- Reproduces the OEM structure of the seam
- Super easy maintenance: no plugging and blocking of the spray opening, no disassembly, no hassle to remove cured product
- Sprays both coarse and fine structure by using a different outer nozzle
- Separate air regulation for product quantity and spray pattern
- Easy to adjust to any desired structure

## LOGO TAPE

### FOL 62

- Adhesive transfer with dimensions 50mm x 300mm for re-fixing logos / emblems on to the panel.
- Clean surface and logo with degreaser, remove cover strip, press the logo down on the adhesive transfer for several seconds and remove adhesive transfer.
- The logo now has enough adhesive in all the right places to be attached permanently to the body work.

## FINIXA BRUSH

### SSS 030

- Semi-rigid nylon brush to apply and structure seam sealers
- Helps copying the original factory finish
- Solvent-resistant

## SPRAY TIP - STANDARD NOZZLE FOR SSS

### SSS 000

- Replacement nozzle for SSS and MSA cartridges
- Standard sealant nozzle

## SPRAY TIP - FLANGED NOZZLE FOR SSS

### SSS 005

- Creates perfect straight beads up to 13mm wide.
- Cut flange to obtain the precise distance from edge of panel.

# SANDING

*Based on our experience in the professional body shop and in cooperation with several paint manufacturers, we have developed a complete program of abrasives adapted to the latest technology in car refinishing. With the introduction of environmentally friendly paints, high-solid products, UV-primers, clear coats, waterbased paints, anti-scratch coatings, self-repairing clear coats, anti-chip clear coats, etc. into the automotive refinish, the requirements that present day abrasives have to meet, have evolved substantially. With Finixa abrasives, you do not only get a complete program of different shapes to be used by hand or with a sander, but you get a cost effective product that is fast, sharp and long-lasting in any modern application.*

## SHARP WHITE

### SHARPWHITE SANDING FILM DISC - Ø 150MM - MULTIHOLE

SFDC 0080-0800

- High initial cutting power
- Longer disc life
- Excellent dust extraction
- Quick and easy disc change
- Adapted to the latest paint systems
- Ultra-flat film backing
- Developed for 5mm "Dual action" sanders

#### AVAILABLE GRITS

P80, P120, P150, P180, P220, P240, P320, P400, P500, P600, P800

[FILM DISC](#)

[WATCH VIDEO](#)

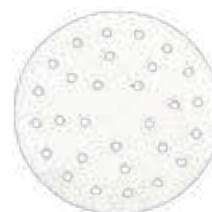

Ø 150 mm  
multihole

**SharpWhite** is made of a new type of ceramic aluminium oxide with a high initial cutting power for efficient sanding. Because of its high cutting speed, this premium abrasive saves significantly on labour! The white, anti-clogging coating makes sure the abrasive is durable and the multi-hole feature guarantees a dust free environment.

**SharpWhite** sands up to 20% faster than the average sanding disc. Using SharpWhite significantly reduces labour costs and allows technicians to do more repairs. More repairs lead to more revenue and a greater use of invested equipment and spray booth, allowing a faster return on investment.

- **Longer disc life;** white, anti-clogging coating that helps keep the disc from loading up during sanding
- **Excellent dust extraction** due to the multi-hole pattern
- **Adapted to the latest paint systems;** works perfectly on air-drying primers, scratch-resistant clearcoats and UV cured paints
- **Ultra flat film backing;** results in a consistent scratch pattern

Ø 75 mm  
multihole

#### AVAILABLE GRITS

## **SHARP WHITE**

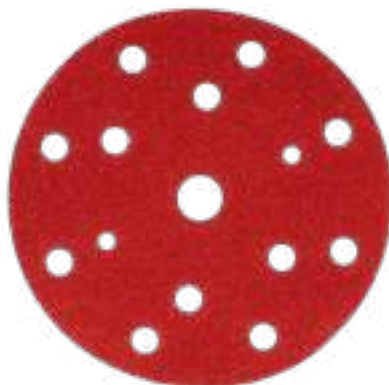

Ø 75mm

### **SHARPWHITE SANDING DISC Ø75MM - MULTIHOLE**

**SFDD 0080-0800**

- Fast, accurate, dust-free sanding
- Developed for spot and smart repair
- Perfect for sanding hard to reach areas
- A must-have for bumper and wheel repair
- Quick & easy disc change
- For 75mm dual action sanders
- Longer disc life; white, anti-clogging coating that helps keep the disc from loading up during sanding
- Excellent dust extraction ; 29 holes
- Adapted to the latest paint systems; works perfectly on air-drying primers, scratch-resistant clearcoats and UV cured paints
- Ultra flat film backing results in a consistent scratch pattern

**FILM DISC**

Ø 150 mm  
15 holes

## SANDING DISC Ø 150MM - 15 HOLES

### SPDA 0040-1200

- Paper carrier disc
- Self-sharpening grits, blue fired treated aluminium oxide
- Faster sanding due to self-sharpening technology
- Longer lifespan due to self-sharpening technology
- Stearate coated, to prevent clogging
- Can be used on polyester putties, high solid primers, clear coats, as well as old & and new paints

### AVAILABLE GRITS

P40, P60, P80, P100, P120, P150, P180, P220, P240, P280, P320, P360, P400, P500, P600, P800, P1000, P1200

### PAPER DISC

Based on our experience in the professional body shop and in cooperation with several paint manufacturers, we developed a complete program of abrasives adapted to the latest technology in car refinishing.

With the introduction of environmentally friendly paints, high-solid products, UV primers and clear coats, water based paints, anti-scratch coatings, self-repairing clear coats, anti-chip clear coats, ... into the automotive refinish, 21st century abrasives requirements have evolved substantially. Therefore, with abrasives, one does not only get a complete program in different shapes to be used by hand or with a sander, but a cost effective product that is fast, sharp and long-lasting on any modern application.

The technology is the result of years of trial and error combined with the feedback of paint manufacturers. Where in the past an abrasive was a question of getting a grid glued to a paper laminated with Velcro, today's abrasives are:

- Double glued layer of the grit avoiding detachment of the grit.
- Blue fired aluminium oxide grit partly enriched with diamond based powder, increasing the durability.
- Uniformed orientation of the grit on the backing, ensuring the sharpest point of the grit is making contact with the surface increasing the sharpness and speed during sanding.
- Stearate coating avoids clogging of dust particles into the abrasive making the paper long lasting.

## PREMIUM PNEUMATIC SANDING MACHINE

### SAM 50-51

- Premium ergonomic eccentric sanding machine
- Very low noise level
- Perfectly balanced centre of gravity
- Vibration-free
- Delivered with sanding pad: diameter 150mm, bottom velcro, 15 holes
- Available with 2,5mm deviation, for finishing work, P400 to P3000
- Available with 5,0mm deviation, for preparation work, P40 to P360
- Built-in speed control, can be adjusted continuously between 0 - 20 000 rpm
- Very light: 790g including sanding pad
- Built-in option to work with or without dust extraction

- 
- Vibrations: 2,48 m/s<sup>2</sup>
  - Noise: 78 dBA
  - Weight: 0,79 kg
  - Motor power: 0,28 HP
  - Free speed: 12.000 RPM
  - Air consumption: 481 L/min
  - Pressure: min. 5 Bar - max 6,2 Bar

**SAM 00**  
Ø 150mm  
2.5 deviation

**SAM 01**  
Ø 150mm  
5.0 deviation

## STANDARD PNEUMATIC SANDING MACHINE

### SAM 00-01

- Standard ergonomic eccentric sanding machine
- Low noise level
- Perfectly balanced centre of gravity
- Low vibration
- Delivered with sanding pad: diameter 150mm, bottom velcro, 15 holes
- SAM 00: available with 2,5mm deviation, for finishing work, P400 to P3000
- SAM 01: available with 5,0mm deviation, for preparation work, P40 to P360
- Built-in speed control, can be adjusted continuously between 0 - 20 000 rpm
- Extremely light: 660g including sanding pad
- Built-in option to work with or without dust extraction

- 
- Vibrations: 2.5 m/s<sup>2</sup>
  - Noise: 85 dBA
  - Weight: 0.68 kg
  - Motor power: 0.25 HP
  - Free speed: 12000 RPM
  - Air consumption: 470 L/min
  - Pressure: 6.2 Bar

SAM 41  
Ø 75mm

### PREMIUM MINI SANDER WITH CENTRAL VACUUM

#### SAM 41

- 75mm/3 inch - 2.5mm orbital, pneumatic palm sander with central vacuum
- Premium ergonomic eccentric sanding machine
- Perfectly balanced centre of gravity
- Low vibration
- Delivered with sanding pad: diameter 75 mm, medium density, bottom velcro, 3 holes
- Built-in speed control, can be adjusted continuously between 0 - 20 000 RPM
- Very light: 570g including sanding pad
- Built-in option to work with or without dust extraction

- Vibrations: 2m/s<sup>2</sup>
- Noise: 80 dBA
- Weight: 0,57 kg
- Motor power: 0,28 HP
- Free speed: 12.000 RPM
- Air consumption: 481 L/min
- Pressure: 6.2 Bar

### PALM SANDER

#### SAM 02

- 75mm/3 inch - 2.5mm orbital palm sander
- Ergonomic grip provides greater operator, comfort and control
- Built-in regulator for accurate speed control
- Muffling system to reduce sound level

- Pad Size: 3" (76mm)
- Spindle Thread: 5/16"-24
- Orbit: 2.5mm
- Free Speed: 13,000 rpm
- Motor Power: 0.25 HP
- Weight: 1.25lbs (0.56kgs)
- Length: 4-3/4" (120mm)
- Sound dBA: 83
- Vibration level: 2.5 m/s<sup>2</sup>
- Average Air Consumption: 4 cfm/113,2 L/min

## SANDING PAD UNIVERSAL VELCRO

### SAM 125S-125M

- Sanding pad 8 holes, Ø 125mm.
- Supplied with the necessary spacers and different bolts.
- Fits on all types of sanding machines except brand specific quick change coupling.
- S for soft: generally used on sanding machines with 2,5mm deviation and grit P400 or finer.
- M for medium: generally used on sanding machines with 5mm deviation and grit P400 or coarser.

## SANDING PAD UNIVERSAL VELCRO

### SAM 15S-15M

- Sanding pad 15 holes, Ø 150mm.
- Supplied with the necessary spacers and different bolts.
- Fits on all sanding machines with the exception of machines with brand specific 'quick change' coupling.
- S for soft, generally used on sanding machines with 2,5mm deviation and grit P400 or finer.
- M for medium, generally used on sanding machines with 5mm deviation and grit P400 or coarser.

## SANDING PAD Ø 150MM SHARPWHITE

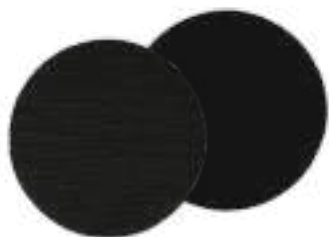

### SAM 75S-75M

- Sanding pad 75 holes, Ø 150mm.
- Used with SharpWhite sanding discs SFDC Ø 150mm (identical hole pattern)
- S for soft, generally used on sanding machines with 2,5mm deviation and grit P400 or finer.
- M for medium, generally used on sanding machines with 5mm deviation and grit P400 or coarser.

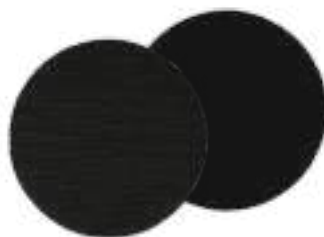

## SOFT INTERFACE PAD

### SAM 36M-37M

- Flexible sanding pad adaptor that changes the existing medium or solid pad on the sanding machine into a soft pad. This way it is possible to combine with finer sanding paper; P600 and finer.
- option 5mm or 10mm
- 15 holes
- 3pcs

SAM 38M  
Ø 75mm - 5mm  
without holes

SAM 39M  
Ø 75mm - 10mm  
without holes

SAB 50  
690mm x 580mm

## SOFT INTERFACE PAD - NO HOLES

### SAM 38M-39M

- Can be used with our finishing film discs SFDF Ø75mm
- Perfect for dry sanding
- option 5mm or 10mm
- 3pcs

## SANDING PAD VELCRO

### SAM 021

- Velcro backing pad Ø 75 mm. - M8 screw thread - no holes – medium density

## SANDING PAD FOR SAM 41

### SAM 411

- Velcro backing pad Ø 75 mm. - ¼ x 20 screw thread - 3 holes – medium density

## QUICK CHANGE SPINDLE FOR 50MM DISCS (TYPE R)

### QCS 00

- Quick change spindle with 6mm. Shaft
- For 50 mm. discs
- TYPE "R"

## VELCRO BOARD FOR SANDING GEAR

### SAB 50

- The organizer for your sanding gear.
- Can easily contain most of your used sanding blocks and 2 eccentric sanders.
- The organization can be personalized, therefore the photograph is showing only one possibility.

**120mm x 98mm x 13mm**  
24p.

## SHARP FOAM PAD

**SFP 0080 - 1000**

Finixa Sharp Foam Pads are produced in an environmentally friendly production line, using only solvent-free adhesives! We believe that it is in everyone's interest to continue developing ecological production methods.

We took our responsibility years ago by avoiding solvent-based adhesives as much as possible. Several sanding pads on the market today are still coated with a solvent-based adhesive. Not only are these of lower quality, but they also contribute enormously to air pollution and greenhouse gas emissions.

In addition, the solvent-free adhesive of Finixa Sharp Foam Pads is not only flexible, but more importantly, also much more elastic than solvent-containing adhesives. This is a great advantage for the life span, as the Finixa Sharp Foam Pads are less likely to tear. The solvent-free adhesive is also heat-resistant. No performance reduction only because of the sanding friction.

The Finixa Sharp Foam Pads are also coated with an extra ceramic-coated aluminum oxide grit, which makes them stronger and more durable. An additional advantage is that the ceramic coating also counteracts clogging, which also leads to a more uniform sanding result. The choice for the more expensive red ceramic AO grit makes the product unique and, in combination with the print on the side, clearly recognizable.

- 2-sided abrasive
- Super soft backing foam allowing the product to adapt perfectly to all profiled work pieces
- Extra flexible but resistant
- Pressure distributing foam reduces sanding through and guarantees an even and uniform sanding pattern
- Less clogging for longer use
- Dry or wet application
- Ceramic coated aluminium oxide
- 7 grits: 80, 120, 220, 320, 500, 800, 1000
- Pad size: 120 x 98 x 13 mm
- Packed per 24 pcs

### AVAILABLE GRITS

## SANDING SHEET

### SPLA 0080-0320

- Self sharpening Blue Fired aluminium oxide grit for more durability of the abrasive.
- The abrasive grit is bonded so that the sharpest side of the grain is always in contact with the surface, increasing sharpness and speed during sanding.
- The red stearate coating reduces clogging of the sanding sheets, making it last longer.

### AVAILABLE GRITS

P80, P120, P150, P180,  
P220, P240, P320

### PAPER BACKING

## SANDING SHEET - WATERPROOF

### SPLA 0400-2500

- Specially developed for wet use.
- Silicon carbide grit with fast initial cutting power.
- Leaves a consistent, fine sanding pattern that is easy to polish afterwards.

### AVAILABLE GRITS

P400, P500, P600, P800, P1000, P1200,  
P1500, P2000, P2500

### PAPER BACKING

## FOAM BACKING ABRASIVE ON A ROLL

### SPFA 0080-1000

- Sanding paper on roll with foam backing.
- Packed in a handy dispenser box; provides protection from dust and other pollution.
- The sanding paper is perforated; each single sheet (114mm x 125mm) can easily be torn off.
- At the back the paper has a comfortable foam; even pressure during manual sanding.
- Easily adjusts to round, concave or convex shapes.
- Prevents sanding at the edges.
- The foam backing can be used to easily free the sanded surface from sanding dust.

150mm x 70mm

### SANDING BLOCK FLAT HAND GRIP + 3 DIFFERENT SHAPES

#### SAB 07

- Set of sanding blocks with 3 different shapes
- Use your sanding disks on your universal sanding blocks
- Ergonomic grip
- 3 different shapes to sand flat, concave and convex surfaces
- No more waste of half used sanding discs
- To use with Ø 15 cm red SPDA or white SFDC

SAB 35  
70mm x 198mm

### SANDING BLOCK WITH EXTRACTION + 4 DIFFERENT SHAPES

#### SAB 35

- Ergonomic grip
- 4 extensions, 8 holes
- Balanced weight distribution for an equal pressure
- Equipped with a connection for dust extraction
- Equipped with a rounded angle to easily remove the used sanding paper

SAB 30  
70x127mm

SAB 32

## SCUFF ROLLS

### SBR 10-20-30

- Non-woven nylon abrasive tissue with impregnated sanding grain, to quickly and comfortably depolish surfaces that need to be sprayed.
- SBR 10: very fine - red - P360
- SBR 20: ultra fine - grey - P1500
- SBR 30: micro fine - gold - P2000

### POLYAMIDE FIBERS

## MATTING COMPOUND

### POL 70

- Matting compound is a composition of liquid chemicals and abrasives intended for surface preparation prior to the blending and painting of new panels. It is suited for any type of paint including waterborne. To be used in combination with non-woven cloth, for instance the SOF 20 or SBR 20.
- For all types of paints
- Gives a matt surface
- Easy to apply
- Easy to remove without traces
- Can be used dry or combined with degreaser DGR
- Water-based product

## SANDING DISC

## MASKING

*Automotive masking tape, paper and film are the key products for masking cars and other vehicles with professional results. A good masking job will result in a superior, clean finish once the painting process is complete. Masking requires time and attention to detail. Finixa offers a wide range of professional masking products that will save you a lot of time and guarantee a top finish. Before you start masking, make sure the car is free of dust and degreased for maximum adhesion and a good end result.*

### PREMIUM+ MASKING FILM - PAINT ADHESIVE & MOISTURE ABSORBANT

**MSF 34015 -35012 - 36010**

- The lilac transparent masking film is not only a good static masking film that holds paint on the exterior of the film, it also has a special layer on the inside of the film that absorbs humidity from the car. This avoids white spots after spraying.
- Excellent paint adhesion on the exterior side (logo side).
- Easily cut.
- Statically loaded: can be applied by 1 person.

	AVAILABLE SIZES:			
<b>MSF 34015</b>	4 x 150	●		
<b>MSF 35012</b>	5 x 120	●	●	
<b>MSF 36010</b>	6 x 100	●	●	●

**NEW**

## PREMIUM+ MASKING FILM - PAINT ADHESIVE

### MSF 24015

- HDPE white transparent film printed to indicate the paint absorbent side.
- The film is slightly transparent to facilitate cutting away the surface to be painted.
- Sufficiently static to protect the vehicle from overspray
- Folded in such a way that the film can be unrolled, unfolded and cut by only one person.
- Film has corona treatment for optimum paint adhesion.

### AVAILABLE SIZES:

- MSF 24015 : 4 x 150m

### SUITED FOR

**NEW**

## MASKING TAPE CORAL 110°

### MST 419-450

- Excellent adhesion on all surfaces, also on plastic and rubber
- Perfect 'tape on tape' adhesion
- Easy application on curved profiles and irregular surfaces
- Entirely saturated, compatible with solvent- and water-based paints
- Suited for IR and UV drying
- Easily removable, no residue
- Temperature resistant: 10 minutes at 110°C, 30 minutes at 90°C, 1 hour at 80°C
- Thickness: 132 micron
- Adhesive strength on steel: 4,6 N/25mm

#### AVAILABLE SIZES:

- 19mm x 50m (MST 419)
- 25mm x 50m (MST 425)
- 30mm x 50m (MST 430)
- 38mm x 50m (MST 438)
- 50mm x 50m (MST 450)

 WATCH VIDEO

## MASKING TAPE 120 °C

### MST 719-750

- Entirely saturated masking tape of high adhesive strength
- Can be used with all water- and solvent-based paints
- Easily removable
- Excellent adhesion on most surfaces
- Solvent- & water-resistant
- Suited for IR and UV drying
- Heat resistant: 10 minutes at 120°C, 30 minutes at 90°C
- Thickness: 0,130mm
- Adhesive strength on steel: 4,8 N/25mm

#### AVAILABLE SIZES:

- 19mm x 50m (MST 719)
- 25mm x 50m (MST 725)
- 30mm x 50m (MST 730)
- 38mm x 50m (MST 738)
- 50mm x 50m (MST 750)

**Tip: Always press the tape firmly during application, especially when applying tape on tape. Our tapes are provided with a pressure sensitive adhesive layer. This gives them optimal adhesion.**

## MASKING TAPE GOLD 100 °C

### MST 819-850

- Masking tape of the new generation
- Can be used with all water- and solvent-based automotive paints
- Solvent- and water-resistant
- Excellent adhesion on all surfaces, also on plastic and rubber
- Ultra thin carrier; Japanese flat paper (rice paper)
- Can easily be used in soft curves and can replace fine line tape
- Saves a considerable amount of time during disassembly and assembly
- Never leaves traces of glue, not even on polycarbonate of head and tail lights
- Heat resistant: 30 minutes at 100 °C
- Thickness: 0,09mm
- Adhesive strength on steel: 4,8 N/25mm

#### AVAILABLE SIZES:

- 19mm x 50m (MST 819)
- 25mm x 50m (MST 825)
- 38mm x 50m (MST 838)
- 50mm x 50m (MST 850)

### LIFTING TAPE 'MULTI'

#### FOL 501MT

- Masking tape with two different sized plastic strips for masking various areas of the vehicle.
- The combination of two plastic strips makes it possible to use one tape for three different applications.
- Simply place one, two or the two strips folded together between rubber and panel and then pull away the rubber from the panel by attaching the tape to the wind screen.
- The tape and strips are perforated every 42mm, so they can be torn by hand.
- Always tear from the plastic side to the tape side.

 WATCH VIDEO

**FOL 501**  
**10mm x 10m**

### LIFTING TAPE

#### FOL 51

- Masking tape with 10mm plastic strip for masking around wind screens. Simply place the plastic strip between rubber and panel and then pull away the rubber from the panel by attaching the tape to the window.
- Easy to cut to size with scissors.

**FOL 501ET**  
**10mm x 10m**

### LIFTING TAPE 'EASY TEAR'

#### FOL 51ET

- Masking tape with 10mm plastic strip for masking around wind screens. Simply place the plastic strip between rubber and panel and then pull away the rubber from the panel by attaching the tape to the window.
- The tape and strips are perforated every 46mm, so they can be torn by hand.
- Always tear from the plastic side to the tape side.

JST 15  
15mm x 35m

JST 22  
22mm x 25m

## JOINT STOPPER

### JST 15-22

- The easiest and fastest way to mask door joints and other vehicle gaps before primer application
- Seals and protects jambs from overspray
- No primer build-up on panel edges
- Precise fingertip adjustment
- Unique 8-shape, stays fixed during spraying
- Easy to remove, no glue
- Remove while the primer is still wet to obtain a soft feathered edge
- Reduces process times to a minimum
- Available sizes: 15mm x 35m & 22 mm x 25m

 WATCH VIDEO

## SPON TAPE - ROUND

### SPT 13-17

- Round shaped foam strip for masking joints between two panels.
- One side of the strip has been treated with heat resistant adhesive.
- Simply stick the tape on the inside of one of the panels and close the other panel.
- Protects the joint perfectly, absorbs the paint and avoids edge building.

SPT 13  
13mm x 50m

SPT 17  
17mm x 40m

## SPON TAPE - OVAL

### SPT 25

- Oval shaped spon tape to protect joints during paint work
- Unlike the traditional spontapes, SPT 25 is put on the moving part of the panel
- The paint never comes in contact with the glue layer
- The tape can still be repositioned for a perfect finishing after closing the door
- Foam is perfect to use with fade-out spraying, without edge forming

### WATCH VIDEO

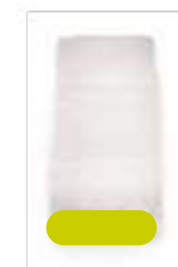

SPT 25  
25mm x 37m

## FLEXI 'NO EDGE' BLENDING TAPE

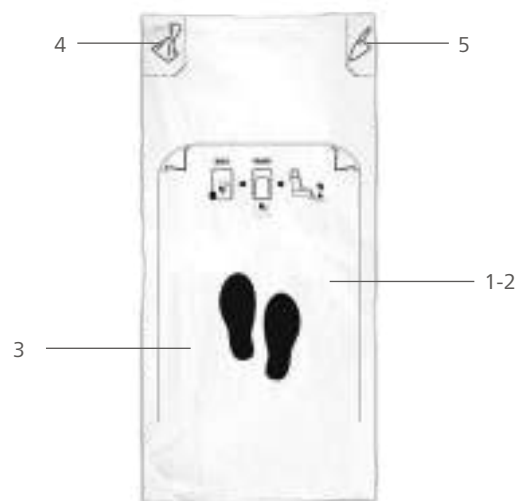

### SPT 05

- Foam tape helps blending out clear coats and 2K topcoats
- Can be used to avoid edge forming by applying primers
- Saves time when sanding primers and polishing clear coats
- Flexible application, also on round forms
- Easy to use for masking curves
- TIP: remove before drying to avoid glue residue

SPT 05  
15mm x 25m

**TECHNICAL SPRAYS**

# 08

---

## TECHNICAL SPRAYS

*Aerosol spray cans are a fast, easy, time saving and cost-effective way to apply paint-like products. Finixa offers a wide range of technical sprays to help the professional body shop in nearly each step of the car body repair process; from the panel beating shop where the focus is mainly on corrosion protection, to primers and fillers for the preparation area and clear coats and lacquers for the paint shop. Finixa technical sprays give you a professional application and finish, especially for smart and spot repair.*

TSP 140

## UNIVERSAL PRIMER/FILLER

### TSP 110-140

- Universal primer/filler in white, light grey, grey and dark grey suitable to finish with all solvent and water based 1K and 2K paints.
- Can be applied on all surfaces, ideal for fast repairs after sanding too hard. Also ideal for spot or panel repair, especially for smaller surfaces.
- Apply fine layers. If you desire a thick layer: first apply 1 full layer at a distance of 30-35cm and afterwards finish with a crosswise layer at a distance of 20cm.
- All primer/fillers sprays have a special nozzle which sprays a flat vertical pattern, comparable to a spray gun.
- Primer with a high viscosity: shake the can very well before the first use.

400ml

**NEW**

## UV PRIMER/FILLER

### TSP 1500

- One component primer/filler; No mixing with other products necessary
- To be dried with UV lamp (UVL 00)
- 1-2 minutes drying (depending on the layer thickness)
- 1 step system
- Higher productivity: increased time efficiency, energy saving
- For use on sanded and clean steel, aluminum, galvanized steel, dried and sanded OEM finishes, polyester fillers, hard and semi-hard plastics, ...
- Ideal for spot & smart repair

[Check out our blog](#)

400ml

**ETCH PRIMER****TSP 190**

- Etching primer for bare metal surfaces. Provides excellent anticorrosion protection.
- Overpaintable without sanding with any 1K or 2K primer/filler.

400ml

**ZINC SPRAY****TSP 410**

- This zinc spray can be used to temporarily protect naked metal before or after welding, can also be used for spot welding, paintable with all 1 and 2K paints, solvent and water based paints.
- Contains 85% zinc.

400ml

### WELD THRU PRIMER - ZINC PHOSPHATE

#### TSP 810

- Alkyd resin based zinc-phosphate anti-corrosion primer offers rust protection for SPOT, MIG & TIG welding applications. High concentration of zinc in the dry film in a fast drying formulation to speed up the welding process with limited impact on the weld.
- Has excellent adhesive properties.
- The product can be used before and after welding.
- Zinc phosphate primer can be painted over with most types of lacquer systems.

400ml

### WELD THRU PRIMER - COPPER

#### TSP 530

- Acrylate resin based copper anti-corrosion primer offers rust protection for SPOT, MIG & TIG welding applications.
- High concentration of copper in the dry film in a fast drying formulation to speed up the welding process with limited impact on the weld.
- Has excellent adhesive properties.
- The product can be used before and after welding.
- Copper primer can be painted over with most types of lacquer systems.

**NEW**

400ml

**WHEEL SPRAY****TSP 520**

- Can be used for a quick and easy repair of alloy wheels in the market
- Fast-drying paint with real metal particles
- Superior paint finish
- Suitable for indoor and outdoor use
- Easy to use
- Time-saving
- UV-resistant

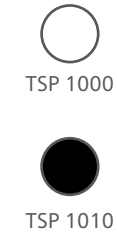

400ml

**1K CLEAR COAT****TSP 180**

- Fast drying, high-quality professional 1K clear coat in aerosol
- Easy application, constant atomization pressure
- Very good flow
- High gloss level
- Good surface hardness
- Resistant to petrol, chemicals and weather influences
- Non-fading and UV resistant.
- Very good polish ability
- No colour deviation
- Easy to fade out with TSP 920 fade-out thinner

**NEW**

400ml

**HIGH GLOSS****TSP 1000-1010**

- Quick-drying, high-quality and professional topcoat
- High gloss
- Easy to use
- Constant pressure spray
- Good surface hardness
- Resistant to petrol, chemicals and weathering
- Colorfast
- UV-resistant
- Easy to polish
- Available in black (RAL 9005) and white (RAL 9010)

400ml

**MATT BLACK****TSP 910**

- Black matt paint for quick plastic repair or to cover up overspray on plastic inner parts in a fast and easy way.

400ml

### ADHESION PROMOTOR

**TSP 030**

- Adhesion promotor to be used on most plastics
- Spray one light coat
- Excellent adhesion
- Fast drying
- Paintable after 15 minutes

400ml

### FADE OUT THINNER

**TSP 920**

- Blending solvent to dissolve edges of clear coats making a perfect transition between old and new clear coat. Universal use as it is compatible with all A-brand clear coats. No spray gun needed; so much faster in SMART repair.

400ml

## STRUCTURE SPRAY

**TSP 550**

- Special product to repair the texture on plastic parts
- Choice of structural finishes
- Easy to use
- Dries very quickly
- Can be painted over with all conventional 1K basecoat and 2K topcoat systems

400ml

## CONTACT GLUE

**TSP 1100**

- Extremely versatile, fast-drying spray adhesive that bonds to a wide range of materials
- Professional, industrial strength
- High initial strength
- High strength, fast, contact type adhesive
- Bonds laminate, wood, metal, plastic and more

400ml

TSP 310

TSP 320

## SANDING GUIDE

**TSP 310-320**

- Black & fluo green
- Unique product! Thanks to unique composition this sanding guide can be sanded after 3 seconds at 20°C without filling the sanding paper.
- Contrary to most comparable products in the market this product causes no extra abrasive consumption.
- Available in black and green.

## CONTROL POWDER

### CPS 150-160

- Control powder is used to detect imperfections. The powder will allow the operator to achieve a perfect flatness of the surface and body contours equal to the original ones.
- Control powder is used for sanding putty as well as for sanding primer.
- Contains 150 g.

## ANTI-GRAVEL

### TSP 210-230

- Anti-gravel is available in light grey and black, supplied with a round thick spray jet to apply the viscous product in thicker layers.
- To get a composition of layers: apply layers crosswise at a distance of 35cm.
- Shortening the distance provides a more glossy result.
- Can be overpainted with most 1K & 2K paints.

## ANTI-GRAVEL COATING

### AGB 01 - AGG 01

- Solvent-based stone chip protection in grey or black colour
- Flexible, good adhesion
- Anti-gravel coating based on synthetic resins and rubbers
- Fast drying, can be applied drip-free
- Excellent rust- and gravel protection, reduces the noise inside cars
- For use on front and rear spoilers, sills, side skirts, wheel arches, etc.
- Can be overpainted with most 1K & 2K paints.

400ml

## CONTROL SPRAY

### TSP 930

The temporary gloss layer of the Finixa control spray replaces the clear coat without leaving any trace on the surface. Spray a thin layer on a sample plate (that is sprayed with a basecoat) to create a temporary shine. Compare the sample plate with the desired color for inspection.

TSP 930 is also the perfect tool to detect imperfections. The gloss layer works as a magnifying glass and it will detect errors faster and easier. Finixa control spray evaporates completely after use without leaving any residue on the sprayed surface.

400ml

## PREFILL SOLVENT-BASED

### TSP 100

- Is pre-filled with propellant compatible with most brands of solvent-based paints.
- The paint is transferred via a filling device into the can to produce a ready-to-use end product (dealers liability).
- Adaptable spray nozzle for horizontal (spray gun effect) to round (for closed parts) alignment of the spray pattern.
- Higher spray rate and higher working speed.
- Ideal for spot repair.

## PREFILL STARTERSET SOLVENT

### TSP 159

- Set of 12pcs TSP 100 and 12 Fillon Pichon Fill-one+ filling caps

12p

12p

## PREFILL WATER-BASED

### TSP 900

- Spray can pre-filled with a propellant, compatible with most brands of water-based paints.
- The paint is transferred via a filling device into the can to produce a ready-to-use end product (dealers liability).
- Adaptable spray nozzle for horizontal (spray gun effect) to round (for closed parts) alignment of the spray pattern.
- Higher spray rate and higher working speed.
- Ideal for spot repair.

## PREFILL STARTERSET WATERBASED

# SPRAY BOOTH MAINTENANCE AND PROTECTION

*Finixa offers a complete line of washable and strippable coatings that provide an economic alternative to labour intensive spray booth scraping and cleaning. There is no bigger investment in an autobody shop than the paint booth. And the booth is where the final, most visible step in the repair process takes place. A properly maintained paint booth can mean the difference between success and failure for a repair shop.*

## DUST CONTROL

### DUC 05-10-25

- The most original and efficient formula for suppressing dust circulation inside a spraybooth, workshop and warehouse. Dust Control ionizes the dust so it is being drawn together in clusters which makes it to heavy to circulate in the air. Mist economically with pressure sprayer.
- Biodegradable.
- Inhouse development and production
- Water-based product
- **Number of layers (min-max):** 1/1
- **Coverage:** 80m<sup>2</sup> / L
- **Drying time:** 10 min
- **Removal:** not applicable

#### Application:

- Make sure the surface is dry
- Apply with a pressure sprayer - fill the pump to 3/4
- Atomize the product lightly but regularly
- For optimal results use on a daily basis

DUC 50

### DUST CONTROL PRESSURE SPRAYER

#### DUC 50

- Designed for dust control application
- 5l manual pressure sprayer
- Adjustable spray nozzle, trigger lock
- Pressure release valve
- Shoulder strap

5L  
CBC 05

CBC 05

### SPRAY BOOTH CLEAN 5L

#### CBC 05

- Biodegradable paint solvent
- Water-based
- VOC-free
- Apply the product with a brush or roll, let it rest for 5 to 15 minutes and then remove with a rag
- Rinse with water
- Dissolves both water-based and solvent-based 1 and 2K paint products
- Useful to remove dried remaining paint on spray guns, paint mix tables, mixing room, floor and spray booth walls
- Warning: always test on a small surface first

This paint stripper is based on microorganisms that break down the paint. Because of this, it is advised to let the product sit for about 15-20 minutes to get the best result.

## SPRAY BOOTH PROTECT PRO

### CBP 05-10-25

- Transparent, tacky and washable coating for the protection of spraybooth walls against overspray. Product stays tacky in order to hold on to swirling dust.
- Apply one thick layer by means of a pressure tank, airmix or airless pump in 1 thick layer.
- Remove afterwards with water and sponge.
- Biodegradable.
- Remove or apply another coat when the product is no longer tacky.
- Average consumption per spraybooth: 12L.
- Depending on temperature and humidity, the product will stay tacky for 10-12 weeks.
- Water-based product
- **Number of layers (min-max):** 1/3
- **Coverage:** 10m<sup>2</sup>/L/layer
- **Drying time:** 15 min. 60°
- **Removal:** water and sponge - high-pressure washer

#### Application:

- Paint roller: no dilution
- Spray gun: needle 2.5
- Pressure tank: 2.0 - no dilution
- Airless: tip 515-0.015" - no dilution

## SPRAY BOOTH PROTECT PERFORMANCE

### CBP 05-10-25P

- Improved formula for a smooth finish.
- Transparent, tacky and washable coating for the protection of spraybooth walls against overspray. Product stays tacky in order to hold on to swirling dust.
- Apply with spray gun (2.5) in two or three coats. The thicker the total coat, the longer it stays active. Applying another coat after some time will re-activate the product.
- Remove afterwards with water and sponge.
- Biodegradable.
- Remove or apply another coat when the product is no longer tacky.
- Average consumption per spraybooth: 15L.
- Depending on temperature and humidity, product will stay tacky for 6 - 8 weeks.
- Can be applied over 2 dried layers of powerpeel for easy removal
- Water-based product
- **Number of layers (min-max):** 2/4
- **Coverage:** 8m<sup>2</sup>/L/layer
- **Drying time:** 15 min. 60°
- **Removal:** water and sponge - high-pressure washer

#### Application:

- Paint roller: no dilution
- Spray gun: needle 2.5
- Pressure tank: 2.0 - no dilution
- Airless: tip 515-0.015" - no dilution

**NEW**

PWP 05T  
**Transparent**

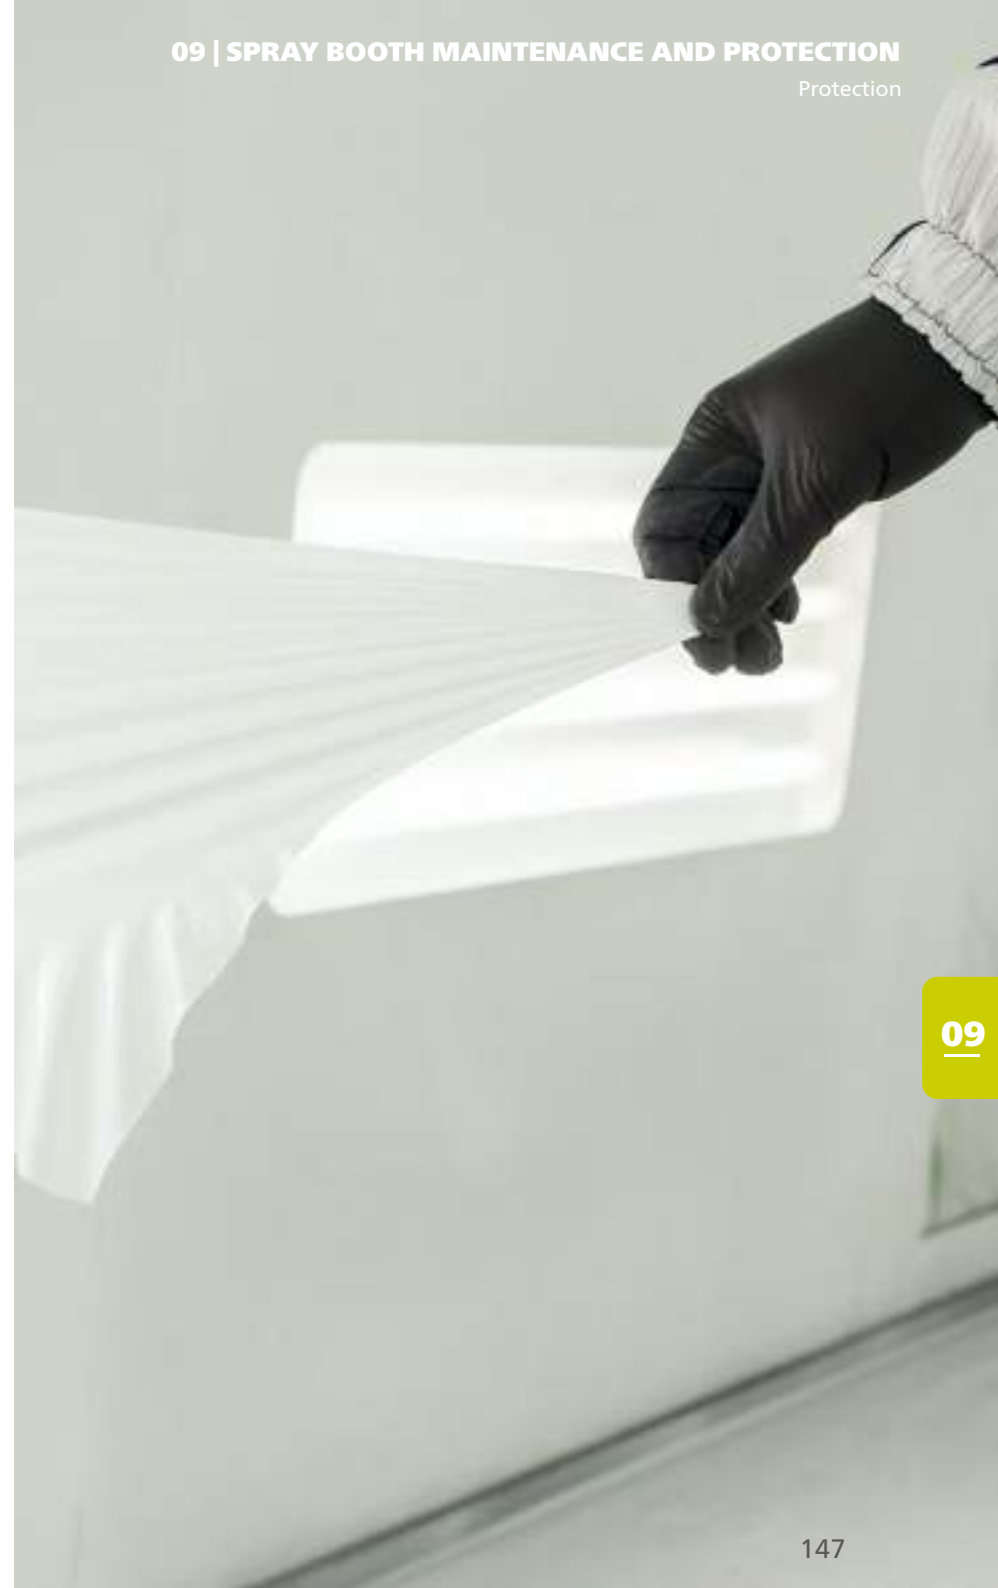

PWP 05W  
**White**

**POWERPEEL****PWP 05T - 05W**

- Easy peelable coating for the protection of spray booth walls against overspray
- Available in white and transparent
- Apply with a spray gun (2.5mm nozzle) in only 1 coat. (We suggest using our SPG 80+81)
- Bidon of 5L fits perfectly in SPG 80
- Water-based product
- Easy to remove with water when it's liquid
- When dried, powerpeel can't be removed with water. This makes it possible to apply a coating of our CBP (active for 10-12 weeks). When the CBP has dried up, peel both layers off at once
- Effortlessly protect your spray booth walls with our peelable coating

**Application:**

- Paint roller: no dilution
- Spray gun: needle 2.5
- Pressure tank: 3.0 - no dilution
- Airless: tip 517-0.017" - no dilution

5L  
CLM 05

## LIQUID MASKING WALL PROTECTION - WASHABLE

CLM 05

- Has the same application as Spraybooth Protect transparent washable coating (CBP), but CLM 05 dries completely and does not stay tacky
- Apply with spraygun (1.5) in one thick coat - remove with water and sponge
- Biodegradable
- Water-based product
- Can be used to mask off large surfaces to protect against overspray
- **Number of layers (min-max):** 1/3
- **Coverage:** 15m<sup>2</sup>/L/layer
- **Drying time:** 15 min. 60°
- **Removal:** water and sponge - high-pressure washer

### Application:

- Paint roller: no dilution
- Spray gun: needle 1.5
- Pressure tank: 1.8 - no dilution

17L  
CPP 17

## SPRAY BOOTH PROTECT - PEELABLE

CPP 17

- White, peelable coating for the protection of spraybooth walls against overspray.
- Apply with a spraygun (2.5) in 2 to 3 coats.
- After contamination, it is best to put an extra coat on and repeat, this will save time and makes it easier to peel off the coating in one piece once it has reached a certain thickness.
- Biodegradable.
- Water-based product
- **Number of layers (min-max):** 2-15
- **Coverage:** 5-6m<sup>2</sup>/L/layer
- **Drying time:** 15 min. 60°
- **Removal:** peeling

### Application:

- Paint roller: no dilution
- Spray gun: needle 2.5 - dilution max. 3% water
- Pressure tank: 2.0 - no dilution
- Airless: tip 619-0.019" - no dilution

## SELF-ADHESIVE PROTECTION FILM - WHITE

### PRF 600-1200

- A white polypropylene adhesive film, designed to protect any kind of surface from chemical products
- To protect mixing tables and floors from getting contaminated by overspray, paint spill, oil, etc.
- Skid proof, even wet, due to grain particles in the film
- Acrylic adhesive layer
- Clean removal, no residue up to 10 days
- White colour for optimal light reflection
- Good dimensional stability and flatness
- Low electrostatic charge
- Good barrier to water vapor
- Resistant to oils and greases
- Good puncture, flex and crack resistance

## SPRAY BOOTH PROTECT TAPE - WHITE

### CPT 50

- All-purpose white duct tape to seal the seams between self-adhesive protection films PRF 600 or 1200
- Unwinds easily
- Applies smoothly
- Excellent for reinforcing
- 50mm x 50 m

# PERSONAL PROTECTION

*When preparing surfaces or applying paint, a specific level of protection is required against the risks users are exposed to. Finixa's range of protective clothing offers not only protection, but also comfort and durability. Depending on the specific workshop task we offer either reusable or disposable dust & spray masks, gloves, and coveralls.*

---

<b>152</b>	General information
<b>154</b>	Dust & spray masks
<b>156</b>	Dust & spray masks accessories
<b>158</b>	Gloves
<b>161</b>	Personal hygiene
<b>163</b>	Spray overalls

All Finixa personal protection equipment is compliant with the PPE Regulation 2016/425. The aim of this regulation is to ensure common standards for personal protective equipment (PPE) in the European Union in terms of protection of health and the safety of users. In short, it defines legal obligations to ensure that PPE on the EU internal market provides the highest level of protection against risks (a EU Declaration of Conformity is available for each product).

## CARBON DUST MASK

### MAS 13

- Safety class FFP2.
- Lightweight structure for easy breathing and comfortable wear
- Advanced low resistant exhalation valve reduces hot air build-up and makes breathing easy in hot/humid environments
- Latex-free material to avoid irritation
- Charcoal filter parts absorbing any hazardous dust particles.
- Packed per 5.

CE 2797  
EN149:2001+A1:2009

## DUST MASK P3 WITH VALVE

### MAS 35

- Safety class FFP3.
- Lightweight structure results in easy breathing and comfortable wear
- Advanced low resistant exhalation valve reduces hot air build-up and makes breathing easy in hot/humid environments
- Latex-free material to avoid irritation
- Ergonomic mask shape provides custom seal for different facial sizes
- Half-face seal foam and adjustable strap reinforce the seal for lowest leakage
- Packed per 10.

**TIP: when you feel cold through the gloves while using them in combination with solvent products, you have to replace the gloves even if they don't show any holes. The solvent will come through the gloves and will penetrate human skin and body.**

## IMPREGNATED CLEANING CLOTHS

### SCR 100

- Scrubs impregnated cleaning cloths 100p. in dispenser bucket
- Polypropylene cloth impregnated with a cleaner suitable for removal of solvent and water based paints, ink, grease oil, wax etc.
- Very suitable for places where there is no washing facility.
- Orange cloths 26cm x 27cm.

**IMPROVED****HAND CLEANER****HCL 3000**

- All-round soap for the bodyshop professional.
- Specifically designed for removing solvent- and water-based paints, glue, oil, grease and other contamination.
- Biodegradable.
- Contains a hand moisturizing and hand nutrient agent, based on aloe vera.

Made with ground walnut shells. The walnut shells provide an abrasive effect to get the contamination off your hands. This used to be done with 'microspheres' made of plastic but is very harmful to the environment. That's why we chose the walnut as an ecological replacement.

CAN BE USED WITH:

**STANDARD PUMP FOR HCL 3000****HCL 3001**

CAN BE USED WITH:

**PREMIUM PUMP FOR HCL 3000****HCL 3002**

CAN BE USED WITH:

**WALLHOLDER FOR HCL 3000****HCL 3003**

## KNEE PAD FOR SPRAY OVERALL GREY

### SOGK 02

- Comfortable and certified knee protection
- Ideal if you only kneel down now and again during indoor work on even surfaces
- Can be placed at different heights in the kneepad pocket
- Always in place – high sides prevent the knee from sliding off the kneepad
- One size
- Material: 100% polyethylene

Washable at  
30°C

anti-static tested  
EN1149:1

## POLYESTER SPRAY OVERALL WITH OPTIONAL GREY KNEE PROTECTION

### SOG 07-11

- Very strong high-density, grey overall
- Polyester is antistatic and therefore attracts less dust
- Polyester fibre that protects against paint penetration
- With hood and breast pocket
- New design of sleeves insert for optimal arm movement
- Air ventilation on back, armpit and crotch
- Cord cuffs at the wrists and ankles
- With optional knee protection

## HIGH TECH SPRAY OVERALL

### PHO 07-11

- A new revolutionary technology.
- The only washable overall on the market that gives 100% protection during the application of high solid paint products.
- The front is a Teflon-treated polyester fibre that protects against paint penetration.
- The back is completely made of multi dry woven material.
- Multi dry absorbs all the perspiration of the body and vaporises this humidity into the air (from the head, back, armpits, back of the knee).
- Very comfortable to wear.
- The overall has two large side pockets and one breast pocket.
- It also has shoe protection.
- Centred waist band for comfort.
- Washable at 30 °C, up to 10 times.

**Carbotec overall & spray coat**

Carbotec models are completing our overall program as highest standard available on the market: Carbotec technology comes in overall or spray coat; made of lint-free & silicone free polyamide filaments in addition, the fabric is woven with 2% carbon fiber to avoid any electrical charging (EN1149:5:2008). The original DuPont Teflon coating ensures that the overall is dirt and water repellent. The AVS ventilation system will guarantee the wearer excellent breathability. The Carbotec offers a high degree of process reliability.

## POLYESTER SPRAY OVERALL WHITE / POLYESTER SPRAY OVERALL BLUE

### NSC-WSC 07-12

- Ultra-light economical polyester overall in 190gr material.
- Reusable and washable spray overall with hood.
- Standard colour: white.
- Also available in blue: for a minimal reflection in the lacquer.
- Polyester has the following advantages (compared to nylon): slows down fire and is therefore safer.
- Polyester 'breathes' and is therefore more comfortable to wear.
- Polyester is antistatic and therefore attracts less dust.

## EQUIPMENT

*Finixa offers you a wide range of technical equipment, as well as the corresponding chemicals and accessories for use in the different departments of your workshop. For the paint mixing room, we offer a complete line of spray gun cleaners for both water- and solvent- based cleaning to ensure your spray guns will stay clean and in optimal condition. Our spray gun cleaners can be modularly adapted to suit your needs. For water-based cleaning, we can offer you gun shampoo, regenerator and coagulation powder. For the spray booth and workshop there are various panel stands and parts storage systems available.*

## QUICK CLEANER

### AGC 50

- To clean all waterborne paints.
- No need to leave the spray booth.
- Saves time.
- Cleaning in 30 seconds.
- To be combined with BTC 80 (waterbased gun shampoo).
- Low consumption of gun shampoo, 5 litre for 100 guns.
- Compatible with all disposable cup systems.
- Atex approved.

AGC 21  
140 cm x 56 cm x 41 cm

## AUTOMATIC GUN CLEANER

### AGC 21

- To be used in combination with cellulose thinner to clean solvent-paint guns or BTC 80, to clean water-based paint guns.
- Equipped with a brush for pre-cleaning.
- Possible after-cleaning with clean material / air mixture.
- Stainless steel.
- Easy assembly, easy to maintain and to operate.
- Volumes and pressure can easily be set on the front panel.
- Dimensions outside (max.): 1400mm high x 560mm wide x 410mm deep.
- Automatic venturi for suction during opening is standard.
- Optionally available with fully automatic after-clean rinsing.

### H2O GUN SHAMPOO

#### BTC 80

- Save time and clean your spray guns for water-based paint automatically.
- You only need 100ml of shampoo for one spray gun.
- Cost reducing and higher customer satisfaction
- Coagulations will reduce the waste heavily (up to 90%) and is collected by an officially recognized company.
- The shampoo can be coagulated up to 10 times.
- Can be used in combination with all automatic and manual spray gun cleaners.
- Water-based product

## REGENERATOR

### BTC 001

- Adding 1l of regenerator to the coagulated BTC 80, brings back the original cleaning power of the BTC 80.
- 1l of regenerator is sufficient for 20l of coagulated BTC 80.

## COAGULATION POWDER

### AEC 90-91

- Powerful universal coagulation powder.
- Depending on the intensity of the pollution, use about 500 gr coagulation powder for 20L contaminated BTC 80.

## COAGULATION SET 25L

### AGC 10

- Can be used to coagulate any type of water based paint.
- Up to 25l.
- Pneumatic mixing system included.
- The cleaned gun shampoo can be easily poured back in the original container using the tap.
- To be regenerated up to full force by adding 1l of Finixa Regenerator.

UVL 00

## UV CURING LAMP

### UVL 00

- Super-fast curing times
- Powerful irradiance with maximum UV-A intensity of  $55 \mu\text{W}/\text{cm}^2$  at 20cm
- Successfully tested on UV paint products from all major paint manufacturers
- Only emits UV-A (395nm) and does not emit UV-B or UV-C
- Active built-in cooling system keeps the lamp cooler in order to maintain optimum light output during extended use
- Ultrasonic distance control
- LCD control display
- Wall-mounted charging station provides a convenient recharging process and better organized workplace

CAN BE USED WITH:

## COLOUR INSPECTION LAMP 360°

### CIL 01

- Handheld, rechargeable inspection lamp for accurate colour matching and detecting paint imperfections
- Highest colour matching of any LED light on the market (CRI 97)
- Body rotates 360°
- Collapsible, 360° rotating hanging hook for hands-free operation
- Extra 3W torch at the front
- 180° folding magnetic base
- Lens can be easily removed and cleaned
- Charging via USB-C + led charge indicator
- High impact resistant rubber coating

## DUAL PEN LIGHT

### DPL 20

- Pocket light with 2 modes: high brightness 2W COB LED and 1W torch
- Slim design for handy inspection
- 360° rotating magnetic clip
- USB connection with removable cover
- Dimensions: L28,4 x W21,6 x H164,1mm
- Soft finish
- Sales unit: displaybox with 20 pen lights

## SOUND DEADENING PADS

### WAP 10

- Self-adhesive sound deadening pads for application inside doors, boot, roof etc. to prevent sound vibration.
- Bitumen based with protection layer, very flexible, easy to cut and heat resistant.
- Each pad can be torn in half due to a perforated line in the middle to make two pads of 25cm x 50cm.

## TRUNK INSULATION PADS

### WAP 15

- Specific flat surface, as OEM-applied in German cars.
- Self-adhesive sound deadening pads for application inside doors, boot, roof etc. to prevent sound vibration.
- Bitumen-based with protection layer, very flexible, easy to cut and heat resistant.

## DOOR FOAM FILM

### PLA 80

- Foam film with adhesive for finishing and isolating inside doors as original.
- Raster printed protection film for easy cutting into shape.

### SPARE PART CART

#### EQU 80

- Keep your parts organized for each job in the handy chariot.
- 2100x650x900mm
- 230kg max.

### BUMPER STAND

#### EQU 50

- Mobile stand for storage of bumpers.
- Equipped with 8 adjustable supports all cushioned for safety.
- Dimensions (LxWxH) packed: 123cm x 31cm x 20cm.
- Weight: 25kg.

### WHEEL AND PANEL STAND

#### EQU 52

- Mobile panel stand with two horizontal supports with two wheel supports on each side.
- The wheel supports can be taken off so the stand can be used for larger panels such as hood or bonnet - horizontal supports are foam-cushioned for safety.
- Dimensions (LxWxH) packed: 91cm x 70cm x 15cm
- Weight: 27kg

### PORTAL ROTATING PANEL STAND

#### EQU 64

- Mobile panel stand with rotating central axis that can be locked under different angles into different positions by means of a foot pedal.
- Supplied with extensions for the axis so that two doors can be fitted one next to the other, 4 vertical supports with hook and 2 supports with holes.
- Maximum load capacity 50kg
- Dimensions (LxWxH) packed: 149cm x 23cm x 16cm
- Weight: 26kg

EQU 53  
91 x 125cm

EQU 60  
19 x 9 x 123,5cm

EQU 61

## BUTTERFLY TRESTLE PREMIUM

### EQU 53

- Folding trestle that can be adjusted in height and width by means of two chains.
- Premium quality, feet are attached by means of an extra bar.
- Dimensions (lxwxh) packed: 107cm x 32cm x 9cm.
- Weight: 8,5kg

## X-TRESTLE STANDARD - GALVANIZED

### EQU 60

- Adjustable trestle with locking system on the axis for different positions.
- Standard X-trestle is galvanized and has a metal axis locking system
- Dimensions : 19cm x 9cm x 123,5cm
- Weight : 8kg
- The bumper supports (EQU 61) are available separately.

## BUMPER SUPPORT FOR EQU 60 - GALVANIZED

### EQU 61

- Bumper support for EQU 60
- Galvanized
- Easy to adjust with 2 plastic wing nuts

BID 00

EQU 91

TRT 27

SUP 00

## TAP FOR BARRELS 20/25/30L

BID 00

## PANEL FIXATION SET

EQU 91

- Set of 4 interchangeable bars that can be used to fixate panels in a firm 'open' position to work on them. For use on doors, bonnet and boot lid.
- Each bar has a hook and an eye for attachment on to a lock.

## TRIM REMOVAL TOOL SET

TRT 27

- With this complete set of plastic tools, interior panel removing without damaging the panel becomes an easy job, good overview without losing any item thanks to the handy toolkit case.

## STEP-UP

SUP 00

- Strong, safe and lightweight: can be used to stand on to reach higher spots on bigger cars and as a seat for comfort during daily activities.
- Strong and durable: handles up to 175kg
- Made of polypropylene and therefore lightweight: weighs only 3,4kg
- No sharp corners; no risk of damaging cars
- Can be used to sit on, but also to stand on to reach rooftops more easily
- Opening in sides as a handle for easy carrying
- Rubber anti slip feet
- Anti slip steps

### ADHESIVE ERASER AND ACCESSORIES

PRD 01-05-55

PRD 10-11

PRD 50

- Rotation disc made of natural rubber available in different models and dimensions.
- To be used on a power drill to remove adhesives, stickers or double sided tape without harming the surface underneath.
- Recommended rotation speed between 2,000 and 4,000 rpm.
- PRD 05: ridged disc; can be fitted directly on the PRD 55 machine.
- PRD 01: can be used on every drilling machine.
- Advantage of PRD 05 over PRD 01: the disc is much wider and is ridged. Due to the ridge the paint does not become warm, there is no paint damage and works three times faster than the PRD 01.
- The combination of PRD 05 with PRD 55 also results in a better finish and is much more user friendly than PRD 01 on a drilling machine.
- PRD 50 : Arbor for PRD 01

*To remove paint and corrosion very fast with a minimum of metal degradation using the metal brush and its adaptor on the Finixa PRD 55; patented quick change technology from the brush on its adaptor, no tools required.*

WATCH VIDEO

### FLUO MARKERS

MAR 11-24

- Handy to mark smaller damages on cars.
- Easily removed by any type of degreaser.
- Available in 2 fluorescent colours: green and pink
- Two sizes: round diameter 4mm / rectangular 15 x 7mm.
- The MAR 1XX (round point) draws a line of 1,5mm wide
- The MAR 2XX (rectangular point) draws a line of 1,5mm on the point, 5mm on the small side and 15mm on the large side.

**TIP:**

- **Not to be used on freshly painted panels as you can create scratches.**
- **Solvents can react with the MAR liquid.**

WMG 00

### WALL MOUNT FOR DISPENSER BOX

#### WMG 00

Conveniently keeps boxes of disposable gloves, tissues, Green Paint System (GPS 0650), or wipes within reach when mounted near work area. The spring-loaded clamp is adjustable to fit many box sizes. Universal holder comes ready to install with 2 adhesive strips on back, for mounting on smooth non-porous surfaces. Two screw holes have been provided, if stronger installation is required. To insert box, push top of holder upwards with box as shown. The “teeth” will clamp down on box and hold it securely in place.
